Dr. Townsend W. Thorndike, Secretary,
The Harvard Travelers Club,
22 Newbury Street,
Boston, Mass.

Dear Dr. Thorndike:

Yours of Saturday is at hand, and thanking you sincerely for your kind invitation, may I say frankly that experience has taught me that I cannot serve God and mammon?---that is to say, that a dinner and a good time before the lecture is apt to be paid for by a dull performance; so that if I may simply report for duty at the Club at eight, I will charge myself with that responsibility, believing that I may be able to perform my obligation. Engagements here will compel my return upon the midnight train.

The ^{talk}lecture is illustrated, and if you will kindly arrange for the lantern and operator, I shall be under obligations.

Yours very truly,

H. Bridgman

Regards to Prof Davis.

HARVARD TRAVELLERS CLUB.

The fifty-fifth Meeting of the Club will be held at the residence of Professor Theodore Lyman, Boylston St. Brookline on Friday evening, October 29th, at 8-15 o'clock. Take Ipswich St. electric car from Subway to Reservoir Lane (30 minutes). Entrance on the left, directly opposite Reservoir Lane.

COMMUNICATION.

Mr. Fritz von Holm, I.R.J. Member of the Royal Asiatic Society will give an illustrated account of the Holm-Nestorian Expedition to Sian-fu, China, in 1907-'08.

Prof. A.B.Hart will speak briefly on Inside Ceylon.

October
~~November~~ 21, 1909.

one or more good work

THE HARVARD TRAVELLERS CLUB

desires to bring its greetings and congratulations to Professor
Frederic Ward Putnam on the auspicious attainment of his seven-
tieth birthday, and to wish for him still many active years where-
in to aid in the advancement of Science and add to the full sheaf
of his well earned Honors,

Charles E. Fay

Vice-President

Francis T. Colby

Acting Secretary

April seventeenth nineteen hundred and nine.

The discourse dealt with a trip undertaken in the College vacation of the year 1908. The speaker left New York on May 30, went to London where he collected his outfit and sailed from Marseilles on June 13. He arrived at Mombassa on July 4th. The climate of this place is pleasant at this period of the year, the town is clean & picturesque. It is worth noting that in the experience of the speaker the passage of the Red Sea presents no inconvenience either in June or September to one who is inured to the summer climate of Cambridge Mass.

The speaker reached Nairobi on July 4th and on the 7th he set out for Naivasha where he joined his caravan and proceeded south westerly into the Sotik plain five days from the rail road. After a brief description of the common game which is to be found in that part of East Africa the speaker gave a rather detailed personal account of his experiences with lions and rhinos. He then concluded by a description of a seven days march back to the railroad, through a gameless country. He took train at Lumbwa Station and arrived at Nairobi just six weeks after the date of his departure from that place. He arrived in New York on Sept 26. The speaker dwelt on the ease, comfort and

Safety with which this trip could be made, and
upon the wonderful interest of the country to be
which he visited. ~~He concluded~~ ^{finally} he pointed
out that a very full description of British East
Africa from almost every point of view could
be found in a large number of well-known
books.

Harvard Travellers Club

The twenty-fifth meeting of the Club will be held at the residence of Mr. Samuel Cabot, Jr., 109 Commonwealth Avenue, Boston, on Friday evening, March 30, at 8 P. M.

Mr. Herbert L. Bridgman, of Brooklyn, N. Y., Secretary of the Peary Arctic Club, will give an illustrated account of a visit to the Soudan, in 1905.

Preliminary notice is here given of the meeting of April 27, when Mr. Anthony Fiala, Commander of the recent Ziegler Polar Expedition, will give an account of the journey, illustrated by a series of moving pictures.

TOWNSEND W. THORNDIKE, Secretary.

The twenty-fifth meeting of the Club was held at the residence of Mr. Samuel Cabot, Jr. Present about eighty.

The guest of the evening was Mr. Bridgman, who gave us a narrative of his journey to the upper waters of the Nile, accompanied by numerous colored stereopticon pictures. He touched upon the complicated political conditions that exist in this region, and mentioned that in one area it was possible to see three different European flags. His speaking was interesting and fluent, and general satisfaction was universally expressed by the members.

Harvard Travellers Club

(Please mail not later than the evening of March 29th.)

I intend to be present at the twenty-fifth meeting of the Harvard Travellers Club, March 30, at 8.00 P. M., and shall bring _____ guest.....

Please underline here (Address Correct), if this notice is sent to your proper address. If not, please indicate desired change in order that corrected address may appear in new list of members, soon to be issued.

NEW YORK,

Feb 16
1906

Mr. W. M. Jarvis
Harvard University,
Cambridge,
Mass.

Dear Sir:

In answer to your kind letter of the
14th I will be glad to speak to the members
of your club, and would state that the
fee mentioned \$100.00 includes all expenses of
operator, apparatus, & etc., and that in connection
with my talk I will exhibit the moving pictures,
and stereopticon slides ~~was~~ ~~increasing~~ ~~of~~ ~~it~~.

In regard to date, April 27th is open for an
engagement, but I cannot accept definitely, for there
is the possibility that I may go abroad in early
April - I will let you know though in a week
or two. The latter part of March is open, but
as you have written, you have already arranged
for an affair or meeting for that time x

In regard to the length of the room ~~say~~ apparatus
will be suitable, and can be arranged to fit the

distance mentioned.

I will be most happy to speak to the members
in the informal way you suggest, and ~~with~~ the
small audience mentioned, it will be possible
for me to tell things and experiences, that would
be excluded from ^{the} regular lecture platform because
of their personal character. ^{and also questions}

I leave for a ten day trip toward Canada next
Tuesday, and I will be pleased to hear from
you before that date if convenient for you.

Thanking you I am

Yours sincerely

Anthony Fiala

COPYRIGHT A. F. ALB 1907

The 26th meeting of the Harvard Travellers Club was held at the residence of Mr. Edward H. Abbot. Present about ninety. The guest of the evening was Mr. Anthony Fiala, he gave a most interesting and, in some respects, extraordinary series of illustrated pictures on the last Ziegler Expedition. He remarked that the cause of his return, which he mentioned as of a sub-rosa nature for the benefit of the Harvard Travellers Club alone was that the members of his party were afraid of starvation if he continued prosecuting his efforts to reach the pole any longer. Personally he did not see any danger on this account, but after carefully considering the question, he concluded that if this feeling obtained that there would be starvation, and that it was better strategy to give in then to try and overcome this opposition. He was most reluctant to do this, as he felt that there was a chance, which if taken, would give the expedition the record of the farthest north. His address was most interesting and modest, and there was much enthusiasm shown.

Following Mr. Fiala's address the president introduced General Abbot, who had been officially connected with the French Canal Company during the days of Des Lessep. He made a few remarks accompanied by several lantern pictures showing views in Panama, and the progress of the American company in its work on the canal.

Following this Dr. Thorndike demonstrated some souvenirs of early Arctic exploration, chiefly referring to the efforts

to discover the north-west passage.

The usual club supper followed.

Mr. Fiala's talk was very opportune for the club, as two of its members are about to start north on the Mickelson Expedition. This expedition is to be gone three years. The ethnologist is to be Mr. Steffansson, and the surgeon Dr. Howe, both members of the club.

he

Mr. Petch.

The 27th annual meeting of the Club was held May 18th, 1906 at the University Club, Boston. Attendance 60. The guest of the evening was Prof. Solon I. Bailey of the Harvard College Observatory, who gave us an account of a journey from Arucepa over the mountains to the head waters of the amazon. He illustrated his talk with some very interesting pictures of the Indians and the generally typography. His route lay from Arucepa over the mountains to the plateau Titicaca, then on to the Madeira waters. One or two of the tribes had never come in contact with a white man before, and were at first very timid on his approach. He mentioned that this was as yet untrodden ground for ethnological work, and in order to gain the confidence of these savages it would require a lengthy period of residence among them.

The Secretary read his annual report which showed the Club to be in a very gratifying condition.

The following names were sent in by the Committee charged with the duty of nominating the various officers for the coming year, -

President, Prof. Wm. M. Davis.

Vice " Dr. Wm. Lord Smith.

Council - Prof. Davis, Dr. Lord Smith, Mr. Wallcut & Dr. Townsend W. Thorndike.

It was moved and seconded that the Secretary cast one ballot for this slate, which he did, and they were elected to their respective offices.

The President announced that the Peabody Museum was to send an expedition to South America next autumn to be gone several years. This expedition will be comprised of members of the Harvard Traveler

Annual Report
1906
Harvard
Travellers Club

Annual Report of the Council of the Harvard Travellers
Club for the year ending May 18, 1906

To the Members of the Harvard Travellers Club:—

The Council has the pleasure of submitting its annual report for the fourth year of the Club's existence.

MEMBERSHIP.

During the year the membership has increased from 172 to 243. Of these 199 are Resident Members and 42 are Non-resident Members, and two are Honorary Members. One new Honorary Member has been elected: Dr. Otto Nordenskjöld of Sweden, who addressed the Club last January. Nine new Life Members have been added to the life-membership, which now numbers fourteen. Forty-nine of the members are Fellows, and of these 33 are Resident.

The membership is divided as follows:

Resident Members,	166
Non-Resident Members,	26
Resident Fellows,	33
Non-resident Fellows,	16
Honorary Members,	2

During the year the following changes have occurred:

New Resident Members,	67
New Non-Resident Members,	3
New Honorary Member,	1
Transferred to Non-Resident Membership,	6
Resigned,	2
Lost by death,	1

In view of the limited number of members who, with their friends, can be accommodated at our meetings, it was voted by the Fellows on April 13th, to limit the Resident Membership to 200. At the same time, it was also voted to increase the annual dues to \$3.00, and the Life Membership fee to \$50.00.

Cash Balance, June 15, 1906,	491.80	
		\$1,484.98

MEETINGS.

There have been held during the year seven regular meetings and one special meeting,—three have been at private houses in Boston and one in Cambridge, and the others at the University Club in Boston. The average attendance has been eighty.

The speakers at these meetings were:

- Dec. 1.—Mr. Bailey Willis
"Experiences Among the Chinese."
Dec. 15.—Mr. E. H. Baynes,
"The American Bison: A Plea for his Preservation."
Prof. Wm. M. Davis,
"A Visit to South Africa."
Jan. 13.—Dr. Otto Nordenskjöld,
"The Swedish Arctic Expedition, 1904-1905."
Jan. 26.—Dr. Alfred M. Tozzer,
"The Natives of Yucatan."
Jan. 26.—Prof. W. H. Pickering,
"The Volcanoes of Hawaii."
Feb. 23.—Mr. Chas. H. Hawes,
"Travels in Eastern Siberia and the Island of
Sakhalien."
Mar. 30.—Mr. H. L. Bridgman,
"A Visit to the Soudan in 1905."
Apr. 27.—Mr. Anthony Fiala,
"Two Years in the Arctic Regions."
May 18.—Prof Solon I. Bailey,
"A Journey from Arequipa over the Andes to the
Headquarters of the Amazon."
The Fellows have held three meetings, at one of which Mr. Chas. P. Perin of New York gave an account of his engineering work in Central India.

AWARD OF CLUB MEDAL.

The Club Medal has been awarded to William B. Cabot, of Boston, for his travels in Labrodar, and his studies of the native languages.

For the Council,

TOWNSEND W. THORNDIKE, Secretary.

Minutes of the 28th Meeting of the Harvard Travellers Club.

The 28th meeting of the Club was held at University Club, on October 26, 1906. There were between fifty and sixty present.

The guest of the evening, Mr. Ellsworth Huntington delivered a most interesting on his explorations in Central Asia. His work in this section covers a period of some nine or ten years, and his efforts have been chiefly directed to studying the effect of the dry climate upon the tribes.

For some time the view has been held that Asia is gradually growing dryer which results in a marked difference not only upon the region itself, but also upon its inhabitants. Mr. Huntington is the first to explore the Salt Desert of Lop Nor, which originally was an inland salt sea, and at the present time owing to the evaporation of the waters is nothing but a vast desert of rock salt, which represents the bottom of the original lake.

The explorer experienced much hardship during the five days it took him to cross the desert because of the intense cold, and the fact that his camels came very near going astray, leaving the party stranded.

Townsend W. Thorndike,

Secretary.

Harvard Travellers Club.

Date,

TO THE SECRETARY OF THE HARVARD TRAVELLERS CLUB:

The undersigned hereby proposes for membership in the Harvard Travellers Club

Name in full

This space should be filled in the manner desired for record.

Occupation

This space should be filled in the manner desired for record.

Permanent address

This space should be filled in the manner desired for record.

Temporary address

This space should contain the address to which notices of meetings etc., are to be sent, if it differs from the permanent address.

} Proposers.

Membership is not limited to Harvard students or graduates, or to travellers, but is open to men who are interested in the object of the Club, namely: "The promotion of intelligent travel and exploration."

Members residing within forty miles of Boston pay an initiation fee of Five Dollars, and thereafter annual dues of Three Dollars. Any member by payment of his initiation fee and Fifty Dollars additional, may become a life member, which exempts him from future annual dues. Members residing more than forty miles from Boston are non-resident members, and pay only the initiation fee of Five Dollars.

NOTE.—It is requested that a brief statement be made on the back of this blank respecting the candidate.

It is always best to assume that the Council knows nothing whatever about the candidate.

It is not necessary that a candidate should have travelled to qualify him for membership.

Extracts from Constitution:

Article II, Clause 5- Fellows are elected from those members whose journeys have led them off the ordinary routes of travel.

Article IV, Clause 4. Nominations to Fellowship shall be made by two Fellows. Such nominations shall be printed and distributed with the notices of the next Fellows meeting. Election to Fellowship must be by ballot. At least eleven Fellows must be present, and four-fifths of those present must vote in the affirmative in order to elect to Fellowship.

This blank, when filled in, should be sent to the Secretary.

Dear Sir :

I have the honor to inform you that at a meeting of the Council of the Harvard Travellers Club you were elected a resident member.

Yours very respectfully,

Secretary.

EXTRACT FROM CONSTITUTION.

ARTICLE V.

Clause 2.—Resident members shall pay an initiation fee of five dollars for the first year and annual dues of three dollars for each succeeding year.

Clause 3.—Any member by payment of fifty dollars is exempt from future annual dues. (*Note—Payment for life membership is fifty-five dollars, i. e. five dollars for initiation fee and fifty dollars for future annual dues.*)

Clause 4.—Non-resident members shall pay an initiation fee of five dollars, but shall be exempt from further payments.

Clause 7.—Initiation fees shall be paid within sixty days after notification of election.

The 30th meeting of the Club will be held at the University Club, 270 Beacon Street, Boston, at eight o'clock, Friday evening, December 21st, 1906.

COMMUNICATIONS.

Dr. Theodore Lyman of Cambridge, Mass., will give an account of "A Hunting Trip in northwestern British Columbia." (Illustrated).

Mr. W. Rodman Peabody, of Cambridge, Mass., will describe "The First Ascent of Mount Mummery, in the Canadian Rockies." (Illustrated).

Mr. Robert P. Blake, of Boston, Mass., will speak on "The Mountain Sheep Country in British Columbia." (Illustrated).

TOWNSEND W. THORNDIKE, Secretary.

[EXTRACTED FROM APPALACHIA, VOL. XI., No. 3.]

The First Ascent of Mount Mummery.

BY ROBERT WALCOTT.

Read December 11, 1906.

To combine the ascent of an unclimbed peak of importance with two weeks' camping in the Rockies of Canada was the motive that led me, with W. Rodman Peabody of Cambridge, and Samuel Cabot, Jr., and I. Tucker Burr, Jr., of Boston, to drive a pack-train into the mountains; for the editor of this journal, who kindly furnished me with valuable assistance of all kinds, had suggested that Mount Mummery, the most accessible high summit on the Blaeberry Valley watershed, was yet unclimbed, and we thought the excursion to it might well be combined with the circuit along the head-waters of the Middle and South Saskatchewan rivers and over Howse and Bow passes. Professor Fay had been one of the British-American climbers whose trip in 1897 is described in "The Head-waters of the Bow," written by Mr. Charles S. Thompson for APPALACHIA of March, 1898, and in "The Ascent of Mount Lefroy and other Climbs," described by Mr. Harold B. Dixon for the "Alpine Journal" of May, 1898. Detailing the view from Mount Gordon, the latter says: "Bearing slightly north of west a fine double-headed snow-peak is visible. Large glaciers pour down its east face. We called it Mount Mummery."

This glacier, according to the map of Professor J. Norman Collie, — the only one covering the country we were to traverse, — discharges into Blaeberry Creek, which, in turn, after thirty

The thirtieth meeting of the Club
was held at the University Club, Boston, on
December 21st, 1906.

Attendance about 65. The speakers
were all members of the Club, and the meeting
therefore was an exceptionally personal one,
and most enjoyable.

Dr. Lyman gave an outline of his journey
on the Stikene^e and Skeena Rivers.

Mr. Peabody spoke on his summer's trip
to the Canadian Rockies, in company with Messrs.
Samuel Cabot and Robert Wolcott.

Mr. Blake described his expedition after
mountain sheep, showing some very interesting
illustrations of these animals.

... a Temporary Craze Which Will Fade Away When the Summer Sun Brings the Common People Again to the Shearing—The Bandit Queen Started It.

"When the frost is on the Bowery and there's no one there to shock," as Happy Jack Thompson, the poet of the Barkers' Club, wrote in his ballad "Coney Island in Winter," the city of odds and ends by the ocean is ordinarily a dull and depressing spot, enlivened only by the

had found in the hulk while ripping her to pieces. Tilyou put the treasure in his safe, but gave Capt. Jack a gold piece, cautioning him not to show it to anybody and especially not to reporters.

Even after Tilyou had admitted reluctantly that the story was true, and that he intended to advertise for the owner and wondered how in the world the news got about, Coney refused to get excited. The inhabitants continued to throng around the curb markets, where copper was jumping up and down, and to sit in the few cafés that are open reading the Tomlawson letters and the mining dope.

Old inhabitants of Coney, who shake their heads and frown when the subject of copper is mentioned, like Grandpa Thurston, who dug clams when the rabbits were skipping on Surf avenue, wonder when the madness is to end. It is only temporary, they believe, and will pass away like a Coney Island fog when the sun of prosperity begins to shine along in April and the barkers begin to bark as the silver goes chinking into the cash boxes.

BELLBOY ACCUSED OF THEFT.

Charged With Stealing Over \$600 From the Hotel Walton's Cash Drawer.

Harry Aaronson, a nineteen-year-old bellboy at the Hotel Walton at Columbus avenue and Seventieth street, was held for trial by Magistrate Barlow in the West Side court yesterday. H. E. Kurster, manager of the hotel, charged the boy with taking over \$600 in various amounts from the cash drawer.

The boy started to work at the hotel a week ago Thursday. He was on the night shift, and the manager found amounts of from \$5 to \$10 missing from the cash drawer almost every night. Last Thursday \$70.59 was missed and Aaronson did not turn up the next day.

TOWNSEND W. THORNDIKE, Secretary.

Minutes of the 32nd Meeting of the Club,
held March 1st, 1907.

Present about 90.

The guest of the evening was Sir Colin Scott Moncrieff, who entertained the Club with a most charming address, full of reminiscences of his long service as a British Engineer in the famine districts of India; the irrigation works in the region of the Nile; and his consulting work with the Russian Government at Merv. During his extensive travels he came in contact with Lord Dufferin, Kuropatkin, the Emperor and Empress of Russia, the Khadive of Egypt, the Sultan of Turkey, and many other notables.

His talk was delightfully personal, and overflowing with humor and anecdotes, and it is with pleasure that the Secretary records another very pleasant meeting of the Club.

Letter read by Selig. At H.T.C.
Mar. 29th. 07.

As you may remember, I came north by the river route for fear of the very thing that has happened--the settling fast of our vessel (which has no motive power) at a point distant from the field of my supposed investigation--the country of the "Kegmollik" or "Ichiglit" Eskimo, which may be said to reach from Herschel Island to the Copper mine, including Walleston Land and (archaeologically) Banks Land. I was in a way inconsistent, however, for I relied on the strong supply steamer which heretofore has never failed to reach Herschel Island when actually billed to do so--and this year she was billed to do it. ~~When she comes in, provisions, rifles, etc.~~ (in fact everything one ordinarily needs) can be bought at Herschel for about San Francisco prices--\$4.00 the hundred for flour, a reeater for \$20.00, etc. This year no ship came in and nothing can be bought. I came with only a few books, 200 rounds for my rifle, and with my photo films all gone--here I was absolutely inconsistent for I decided in Edmonton to take a dozen rolls only for my 3A, trusting to the "Duchess of Bedford" to bring the rest. My situation, therefore, is more interesting than amusing.

When the whalers last August despaired of any ship coming in, they offered to take me west to meet my ship. Everybody seemed to think staying in the country this year was folly. They said there would be starvation. It seemed to me they made too much of the impending hardships, and, of course, did not go--for two sufficient reasons: I might easily pass my ship unseen in a fog or stern; the conditions did not seem to justify running away from work I had come a considerable way to attempt.

When the last whaler left (on Aug. 26) Herschel became untenable--the missionary is off on a vacation, and the police did not seem disposed to take boarders--though the three of them have five men's rations easily, but I had disregarded their advice to go, and they intimated then that I had better not depend on them for help when I was starving "just for contrariness." The island has no resources in game or fish. I therefore secured passage in an east-bound whale boat for Shingle Point (some fifty miles east) where I knew there was plenty fish, and here I have been since. I tasted nothing but fish

the first month, for that was all my Kogmollik host had to offer (though we had tea the first few days. You know how Indians drink tea. I believe the Husky can go them one better. My landlord was in the habit of drinking six cups at a time, and they would run three to the quart easily in capacity. As "hereinafter indicated" we have had some civilized food since about October 1st.

About September 20 an east-going native reported a whaler arrived from the west at Herschel and my ship expected to follow any day. I forthwith got together a crew, secured a whale boat, and went west.

Capt. Leavitt (Portland, Maine) of the steam whaler "Norwhal" (San Francisco) reported that when he left Point Barrow to return (for he was one of the whalers at Herschel this summer) the "Duchess of Bedford" had sent me word she would reach Herschel the same week as Leavitt. He had offered Mikkelsen to take supplies to me, but he had not sent even a letter, so sure was he of getting in. The San Francisco fire had so unsettled the "Norwhal's" owners that Leavitt was short of provisions for himself. Still he let me have 250 pounds of flour, 300 pounds pork, and some molasses. Part of this I have given my Husky to compensate him for the fish I have eaten, part I shall keep against the spring, which is the season of scarcity here.

About Oct. first Mr. Stein, a Dane with an Eskimo wife (the only resident white man on at least 500 miles of coast) came to build a house here. Two cases of consumption in my host's family made me change lodgings, though I really enjoyed myself with the Huskies, who, as a matter of fact, fill this house continually too, so I pick up the language no less readily here than I did before moving.

Mr. Harrison, an English geographer, is encamped some 200 miles from here, on the south end of Eskimo Lake, which is some 50 to 60 miles northeast from the junction of the Mackenzie and Peel rivers. It is said to be a good place for both fish and deer, and he is well equipped in nets and rifles--five rifles and 10,000 rounds to supply himself and three Huskies whom he has hired. But, like myself, he has no films for his camera, and no writing paper. There are only a few leaves left in this wretched tablet of mine. Mr. H. has kindly offered

me to share his camp, and I shall pay him a visit in a few days, taking to him his mail, which the McPherson--Herschel Island police patrol is due to bring now any day. It is the mail that left Edmonton in July and got to McPherson about Oct. 1. If he has plenty deer and fish I shall stay; otherwise I shall come back here. The trip, the Husky who goes with me says, should take us from ten to twelve days each way (the going will be bad). In any case we plan to be together so soon as the days get long (the sun is almost gone now) and to hunt towards the east, making catches if possible. With luck, we shall start for a trip east about the middle of March, hoping to connect with Hamburg's route at the mouth of the copper mine. This is all to be if good luck comes. We may be forced to retreat to Shingle Point and its rotten fish instead (for most of the fish is slightly tainted, to say the least). If we could only start with a little grub of a portable sort to piece out with, the prospect would be a good deal brighter.

To get used to it I have already made one short trip south across the divide into the Yukon drainage area. The Huskies have a hunting camp there--not our Huskies, but some of the Nunatama tribe--and I got two fellows and two sleds to freight some meat from there for Mr. Stein as part return for my keep. His wife is a Nunatama and she has some relatives to send her meat. When it came to a show-down they didn't want to make much of a present, and I had to buy to prevent the trip from being a failure. We traveled south seven pretty hard days, going the latter part of the way down an unmapped branch of the Bell, or the Porcupine--at least unmapped so far as my charts go. Deer were simply thick, but it was black fog the four days we stayed, and we got only one deer from a small band a man saw when going to the river for water. Four men had killed 81 big, fat deer in about two weeks. As a matter of fact they had hunted only a few days out of that time, for it was a foggy spell.

We expect to be at McPherson when the mail is due, July 14, and then we go to Herschel to commence another tedious wait for ships.

It must be a great disappointment to every member of the expedition not to get inside Barrow this year, for along Banks and Prince Albert Land is has been the freest from ice the whalers have ever seen it. They have literally not seen ice east of Herschel this summer. Some

years these islands are absolutely unapproachable.

I hope the Travellers Club has had a successful year, and I hope this reaches you in time to wish you a pleasant Easter.

Sincerely,

(Signed) V. Stefansson.

V. Stefansson, 1914

north of ...

The 33d meeting of the Club was held at the residence of Dr. Thomas Morgan Rotch, 197 Commonwealth Avenue, Boston, March 29th. Attendance 71.

President Davis reported several items of interest about the travelling members. We have, at this report, some twenty-five or thirty members who are travelling and whose routes are well distributed to the different parts of the world. Dr. Howe and Mr. Stefansson, respectively, doctor and ethnologist of the Mickleson's Arctic expedition, are at present with the expedition in the Arctic regions. Mr. Faribre DeMilhau and others are with the Peabody Museum expedition in Chili. Dr. Alexander H. Rice is with the expedition in the hinterland of the U. S. of South America. Professors Coolidge and Gardiner are travelling around the world. Dr. John C. Phillips, recently returned from Corea, is in Northern Mexico. Mr. Roswell Lawrence is in Jamaica. Some dozen or more members are in Europe. Professor Right is in Greece, etc.

Dr. Tozzer was called upon by the President to make a few remarks in regard to the expedition in Chili, and the Secretary of the Club read a letter from Mr. Stefansson dated from Herschel Island, just west of the delta of the MacKenzie River.

The communication of the evening consisted of an illustrated narrative by Dr. Thomas Morgan Rotch. The Doctor last summer took

a journey to the ice pack north of Spitzbergen. He followed the Scandinavian coast northward past the North Cape, and thence onward to Spitzbergen. From this point the party followed Nansen's route to the edge of the ice pack.

Townsend W. Thorndike.

Secretary.

Harvard Travellers Club

(SPECIAL INVITATION)

The 34th meeting of the Club will be held at the residence of Mr. Joseph G. Thorp, 115 Brattle St., Cambridge, at 8 o'clock, Friday evening, April 26th, 1907.

Harvard Travellers Club

The 34th meeting of the Club will be held at the residence of Mr. Joseph G. Thorp, 115 Brattle St., Cambridge, at 8 o'clock, Friday evening, April 26th, 1907.

[Boston members should take Waverly, Belmont, Watertown, or Newton cars, to corner of Mt. Auburn and Willard Sts., then walk through Willard St., to Brattle. Mr. Thorp's house is directly opposite the head of Willard St.]

COMMUNICATIONS.

Mr. W. B. Cabot will give an account of his journey to Northern Labrador in 1906. (Illustrated.)

Dr. Charles W. Townsend will describe his trip "Along the Labrador Coast." (Illustrated.)

TOWNSEND W. THORNDIKE, Secretary.

Members are reminded that the annual meeting will be on the third Friday of next month, May 17th. In accordance with Art. VII, Clause 1, of the Constitution, the nominating committee have nominated the following members as officers for the ensuing year:

WILLIAM M. DAVIS, President.

THEODORE LYMAN, Councillor.

WILLIAM LORD SMITH, Vice-President.

A. LAWRENCE ROTCH, Councillor.

TOWNSEND W. THORNDIKE, Secretary-Treasurer.

Wm B Cabot

The 34th meeting was held April
26th - Present about 40.
T. W. Thorndike
Secy

Minutes of the 5th Annual and 38⁵th Regular Meeting. of the
Harvard Travellers Club.

This meeting was held at the Boston Athletic Club. Present about 90 members. The Council presented its annual report which was duly accepted. The following members were elected as officers for the ensuing year, the Secretary being requested to cast one vote, which he duly did.

President, Prof. William M. Davis.

Vice-President, William Lord Smith.

Secretary and Treasurer, Townsend W. Thorndike.

Council: Prof. Davis, Chairman
Theodore Lyman,
William Lord Smith,
A. Lawrence Rotch,
Townsend W. Thorndike.

The President announced that the medal had been awarded to Mr. Ellsworth Huntington for his explorations in Central Asia. A photograph of the medal was shown, the completion of the medal itself having been delayed on account of a fire in the studio of the engraver.

The speaker of the evening was Mr. Drew, who had long been in the service of the Chinese Customs service. He gave an account of the awakening of China and the influence of European civilization upon the Chinese nation, saying that China was being aroused from its ancient long sleep, and that the Chinese were endeavoring to establish schools, laws, a more liberal government and a better civilization in order to cope with the other nations of the world. The speaker also showed some souvenirs which were presented to him on his departure from China.

Following Mr. Drew, Dr. Tenney, who was formerly President of the great Chinese College at Tientsin, and now director of the Chinese students in the United States, made a few remarks along the same lines as Mr. Drew. He said there was a general desire among the younger Chinese to better their condition and raise the nation in general to a higher civilization plans. He said, however, that their efforts were unsatisfactory, because instead of commencing among the people themselves, as was the case among European nations, the reforms began among the government classes.

He felt that China was permanently on the road to betterment, but that there will still be setbacks on account of the tendency of the educated Chinese to be very radical. As the oldfashioned, conservative forces were still in power, there was to be more or less conflict and disturbance.

The hall was very attractively decorated with Mr. Drew's various bright-colored souvenirs. The supper was served about ten o'clock.

Harvard Travellers Club

The fifth annual and 35th regular meeting of the Club will be held at the Boston Athletic Club (entrance on Blagden Street) at eight o'clock, Friday evening, May 17th, 1907.

BUSINESS

Annual Report of the Council, Election of Officers, Announcement of the Club Medallist.

"Exploration of the Southern Alps of New Zealand" (illustrated), by Dr. James Mackintosh Bell, Director of the Geological Survey of New Zealand, and Curator of the National Geological Museum, Wellington.

TOWNSEND W. THORNDIKE, Secretary.

THE HEART OF THE SOUTHERN ALPS, NEW ZEALAND.

By JAMES MACKINTOSH BELL, Director, Geological Survey, N.Z.

INTRODUCTION.

THE central part of the Southern Alps, which includes the elevated country surrounding the magnificent peak of Mount Cook, presents many features of remarkable interest to the glaciologist and physiographer, and exhibits an area of country of rare charm to the observant alpinist and explorer. This part of the Southern Alps encloses, in addition to Mount Cook, the lofty peaks of Darwin, Malte Brun, Hochstetter Dom, Mount Elie de Beaumont, Mount de la Bêche, Mount Haidinger, Mount Lendenfeld, the Silberhorn, Mount Hector, Mount Tasman, Mount Stokes, and Mount Sefton, all over 9800 feet in height, and rising, clad in perpetual snow, amid spacious fields of *névé*, from which emanate most of the great glaciers of New Zealand. These peaks represent the highest though not the most inaccessible country in New Zealand, and all stand near the island divide. A view obtained from various points of vantage on the divide discloses to the east and west most of the salient physical features of this interesting part of the country. Towards the west is visible the rapid descent of the country towards the Tasman sea; the rugged snow-clad peaks can be seen to be, near at hand, replaced by mountains with snow only on their summits and with their lowest slopes thickly wooded. These give way farther to the westward to wooded hills free from snow which close to the sea pass abruptly into flat or rolling lowlands, covered with dense forest. Towards the east the descent of the country is also rapid, but not nearly so much so as on the western side. The mountains gradually decrease in altitude, and are finally replaced by the rolling treeless stretches of the Mackenzie and Upper Waitaki plains, surmounted by an occasional outlying mountain. The sparseness of forest on the eastern side of the Alps stands in marked contrast to the western side, and only at a few sheltered spots along the lower mountain slopes, near the river courses, are visible the groves of stunted trees.

THE GREAT TASMAN SYSTEM.

Two sections across the Southern Alps—one by the Tasman river, Hooker glacier, Fitzgerald pass, and the Copland valley, and the other by the Tasman glacier, Graham's saddle, and the Franz Josef glacier—will illustrate some of the most striking features of this interesting glacial area.

The longest and widest glacier in New Zealand is the great Tasman glacier, which has a length of 18 miles from its source at the base of the Hochstetter Dom to its terminal face, and a maximum width opposite the

No. II. AUGUST, 1907.]

October 18, 1907.

The thirty-sixth meeting of the Club was held October, 18th. About eighty persons were present. On account of the absence of the president the vice-president presided. The speaker of the evening, Dr. Bell gave an account of his explorations of the southern Alps of New Zealand, confining himself almost entirely to a description of the mountain ranges and enumerable glaciers arising in them.

HARVARD TRAVELLERS CLUB

Nov 11 1907.

The 37th meeting of the Club was held November 29th. Present about ninety.

The speaker of the evening was Mr. Thomas Barbour who had but recently returned from a six months tour of Dutch New Guinea. The object of his exhibition was primarily to make zoological and ethnological ^{collections} for Harvard University. His talk was extremely interesting and copiously illustrated by lantern slides.

Preceding the talk the Club medals for 1906 and 1907 were presented by the President to Mr. W. B. Cabot and Mr. Ellsworth Huntington both the presentation and the reception of the medals were accompanied by appropriate remarks.

Secretary.

The 37th meeting of the Club will be held at the residence of Dr. John C. Phillips, 299 Berkeley Street, Boston, at 8.15 o'clock, Friday evening, Nov. 29th, 1907.

COMMUNICATION.

Mr. Thomas Barbour will give an account of his trip along the "Pacific Coast of Dutch New Guinea," with lantern illustrations.

TOWNSEND W. THORNDIKE, Secretary.

NOTICE REGARDING RESIDENT MEMBERSHIP.

The Council desires to ask attention to the following points regarding Resident Membership.

Resident members are those who reside within forty miles of the State House, Boston. Their number is limited to two hundred. The limit of resident membership was reached last spring, but it has since then been slightly reduced, chiefly by the removal outside the forty-mile circle of a few resident members, who have thereby become non-resident members.

It is particularly requested that, if any members now classed as residents (as indicated by the address to which this notice is sent) have removed outside of the resident membership circle, they should inform the Secretary of their new address, in order that they may be transferred to the non-resident class, thus making it possible to fill their places by the election of new resident members. Should any resident member, who has become a non-resident by removal, return to reside within the forty-mile circle, he will be at once restored to full standing as a resident member,

even if by so doing the number of residents is temporarily raised over the two hundred limit.

The Council, by whom election to membership is made, proposes to select for election those nominees whose addition to our membership promises the greatest benefit to the Club, independent of the order in which the nominations are received. Although there are now in the hands of the Secretary more nominations than there are vacancies to be filled, it is still desired that members should send in additional nominations (upon blanks to be had of the Secretary) of persons whose election they can cordially recommend as of benefit to the Club. It should be remembered that membership is not limited to Harvard graduates or students, or to persons who have travelled extensively (this being the chief qualification for Fellowship), but to men "who are interested in the object of the Club," namely, "the promotion of intelligent travel and exploration."

The next election of new resident members will be made at a Council meeting to be held late in January, 1908.

For the Council,

TOWNSEND W. THORNDIKE, *Secretary.*

THE JAP W

Maj Lynch, USA, Tells
His Experiences.

Class '90 Man Guest of Harvard
Travelers' Club.

Pres Eliot Speaks at the
Brunswick.

The presence of so many distinguished Harvard men at the first dinner of the Harvard travelers' club held at the hotel Brunswick last evening, was a high compliment to that organization and a tribute to Maj Charles Lynch, USA, of the medical department of the general staff, who entertained the members and guests after dinner with his interesting lecture on "Manchuria During the Russo-Japanese War." Maj Lynch is a graduate of the class of '90.

Pres William M. Davis opened the exercises and referred to the presence of members of the Harvard corporation. Seated on either side of Pres Davis at the head table were Pres Charles W. Eliot, Maj Lynch, Prof William M. Davis, Maj Henry F. Higginson, Raphael Pumpelly, Prof A. E. Burton, Prof A. A. Noyes, Dr William Lord Smith, Prof Theodore Lyman, Dr H. P. Walcott, Prof S. V. Bailey, Prof F. W. Putnam, Judge F. C. Lowell, Prof Charles E. Fay and George Wigglesworth, while Charles Francis Adams and others equally distinguished had seats at the other tables.

Although he was not expected to address the members, Pres Eliot did say a few words in lighter vein, in which he complimented Harvard men in organizing so many new clubs. He spoke of the enlightenment of travel, and thought it was a good plan for Harvard men to come together and talk over their experiences.

He referred to the organization of the East Asiatic Harvard club and the Cosmopolitan club of Harvard as new organizations and told of a cablegram he recently received from a Japanese Harvard club urging him to attend a dinner at Tokio. After speaking of the influence of Harvard men all over the world, he told of a very recent visit of an East Indian who, he said, did not want to enter the university, but was anxious to secure a position in a soap factory in order that he might learn the business and return to his native land.

Pres Eliot Speaks at the
Brunswick.

The presence of so many distinguished Harvard men at the first dinner of the Harvard travelers' club held at the hotel Brunswick last evening, was a high compliment to that organization and a tribute to Maj Charles Lynch, USA, of the medical department of the general staff, who entertained the members and guests after dinner with his interesting lecture on "Manchuria During the Russo-Japanese War." Maj Lynch is a graduate of the class of '90.

Pres William M. Davis opened the exercises and referred to the presence of members of the Harvard corporation. Seated on either side of Pres Davis at the head table were Pres Charles W. Eliot, Maj Lynch, Prof William M. Davis, Maj Henry F. Higginson, Raphael Pumpelly, Prof A. E. Burton, Prof A. A. Noyes, Dr William Lord Smith, Prof Theodore Lyman, Dr H. P. Walcott, Prof S. V. Bailey, Prof F. W. Putnam, Judge F. C. Lowell, Prof Charles E. Fay and George Wigglesworth, while Charles Francis Adams and others equally distinguished had seats at the other tables.

Although he was not expected to address the members, Pres Eliot did say a few words in lighter vein, in which he complimented Harvard men in organizing so many new clubs. He spoke of the enlightenment of travel, and thought it was a good plan for Harvard men to come together and talk over their experiences.

He referred to the organization of the East Asiatic Harvard club and the Cosmopolitan club of Harvard as new organizations and told of a cablegram he recently received from a Japanese Harvard club urging him to attend a dinner at Tokio. After speaking of the influence of Harvard men all over the world, he told of a very recent visit of an East Indian who, he said, did not want to enter the university, but was anxious to secure a position in a soap factory in order that he might learn the business and return to his native land.

"I feel that in securing permission of the war department," he said, "to get Maj Lynch to come over and lecture before our medical school and at the union, we were particularly fortunate, owing to his broad experience and the opportunity afforded him in his field of observation."

Maj Lynch had an excellent set of pictures which were shown on a screen.

*First
Army
Dinner*

Manchuria in a dell, ^{and} fully entertaining manner. His observations covered a broad field, the picture of the Japanese forces to which he was attached being very thorough and his description of scenes and incidents of the war being replete with interesting detail.

He showed a map of the battle of Mukden and explained the maneuvers of both forces during the several days' fighting, taking particular pains to cover the work in the improvised hospitals and the Japanese methods of treatment.

He said that the Japs are not up to some western countries in the medical department of their army, but are not far behind. He commented on the shortcomings of our medical department in an interview with a Jap surgeon, who could not conceive how surgeons from civil life could be taken into the army without special training with any degree of efficiency.

At the business meeting the following officers were elected: William M. Davis pres, William Lord Smith vice pres, Townsend W. Thorndike sec-treas, William M. Davis chairman, Theodore Lyman, A. Lawrence Rotch, William Lord Smith, Townsend W. Thorndike council.

Harvard Travellers Club

The first annual dinner and the fortieth meeting of the Harvard Travellers Club will take place at the Hotel Brunswick, Boston, February 14, 1908, at seven o'clock. The price of the dinner will be \$2.00 a plate. Members who intend to be present are requested to fill out the enclosed card and mail it, with their check, to the Secretary.

Among the guests of the evening will be President Eliot of Harvard University, and Major Charles Lynch [Harvard, '90] of the Medical Department, General Staff, U. S. Army.

Following the dinner, Major Lynch, who was attached to the Japanese army as Official Military Observer, will speak on "Manchuria during the Russo-Japanese War", with lantern illustrations.

Minutes of the 41st Meeting of the Harvard Travellers' Club.

The 41st meeting of the Harvard Travellers' Club was held Feb. 28th at University Club, attendance about 75. In the absence of president and vice-president, the secretary presided. The speaker of the evening was Professor Jaggar, who gave an account of his expedition to Alaska in the summer of 1907. This expedition was primarily for the purpose of studying volcanic action in the various groups of islands composing Unalaska. He compared the volcanic action with the phenomena in the islands of Pelee and Martinique.

HARVARD TRAVELLERS CLUB
EXHIBITION MEETING

At a recent meeting of the Council, it was decided to devote a special meeting of the Club to an exhibition of objects of interest belonging to members, and in some way associated with their travels. The exhibition will be held in Horticultural Hall, corner Massachusetts and Huntington avenues, Boston, on Wednesday, March 18, and will be open from 3.00 to 6.30 in the afternoon, and from 8 to 10 in the evening. Tea will be served at 4.30. Short illustrated talks on travel and adventure will be given by members in the evening between 8.30 and 9.30.

Members will be provided with cards of admission for themselves and their friends, including ladies, on application to the Secretary of the Club, 20 Newbury street, Boston.

Each exhibitor is requested to remain near his exhibit during most of the time the hall is open, in order to give personal explanation of his contributions to those who make inquiries about them.

Exhibits have already been promised by a number of members whom the Committee has consulted personally.

In order that a list of the exhibits should be duly printed, it is requested that members taking part in the exhibition should return the enclosed blank to the Chairman not later than March 10.

EXHIBITION COMMITTEE:

WILLIAM LORD SMITH, *Chairman*,
JOHN L. BREMER,
THEODORE LYMAN.

Address of Chairman of Committee,
2 Willow St., Boston.

HARVARD TRAVELLERS CLUB
EXHIBITION MEETING

The Committee requests information on the following points:

1. Will you take part in the proposed exhibition, and give personal explanation of the things that you exhibit?

.....
2. What sort of objects will you exhibit? Sketches, articles of equipments, hunting trophies, products of distant countries, ethnological specimens, enlarged photographs, etc., etc.,

.....
3. How much space (floor, table or racks) will you need?

.....
4. Name and address of exhibitor
.....

.....
Each exhibitor pays for transportation of his exhibit. Boxes sent by express should be addressed to Harvard Travelers Club, Horticultural Hall, Huntington avenue, Boston, and should reach the hall Tuesday afternoon, March 17, or Wednesday morning, March 18.

Exhibitors must open, arrange, and repack their exhibits. A carpenter will be in attendance Wednesday and Thursday forenoon.

Kindly mail this notice, with answers in spaces left for them, not later than March 10 to the Chairman.

WILLIAM LORD SMITH,
The Hermitage, 2 Willow St., Boston, Mass.

HARVARD TRAVELLERS CLUB
EXHIBITION MEETING

The 42nd meeting of the Club will be held in Horticultural Hall, Boston, on Wednesday, March 18. It will begin at 3 o'clock and continue until 10 o'clock in the evening. During the afternoon there will be an exhibition of objects of interest belonging to members and in some way associated with their travels. Tea will be served at 4.30. In the evening there will be given short illustrated talks on travel and adventure by members.

Members will be provided with cards of admission for themselves and their friends, including ladies, on application to the Secretary of the Club, 20 Newbury street, Boston.

18
The 42nd or exhibition meeting of the club was held March 28th and was an unqualified success. The attendance for both afternoon and evening was between ten and twelve hundred and the number of specimen shown roughly estimated was between five and ten thousand. The exhibits were attractively arranged around the sides of the hall while in the center were several attractively laid tables at which tea was served. In the evening the centre of the hall was cleared and seats arranged for the speaking.

Prof. Davis opened the evening session with a brief history of the club and showed a miscellaneous collection of lantern slides to demonstrate the variety of subjects that the club has had at its meetings. Following the President, Mr. Thomas Barber gave a short account of his expedition to Dutch New Guinea. The last speaker was Mr. Ellsworth Huntington who gave a brief narrative of his journey in Turkestan. One of the attractive features of the exhibition was that the owner stood by his collection and gave personal accounts of the specimen to those who were interested.

Respectfully Submitted,

W. B. Murray
S. J. Bailey
H. J. Spinden

} Committee.

The Nominating Committee report the following names to be voted for at the annual meeting:

President, Prof. William M. Davis.

Vice-President, Prof. Charles E. Fay.

Secretary and Treasurer, Dr. William Lord Smith.

Council, Prof. Theodore Lyman, Dr. Townsend W. Thorndike.

The Annual Meeting of the Club will be held on Friday evening, May 15th. The speaker of the evening will be Prof. R. S. Tarr of Cornell University, who will give an illustrated account of the Glaciers of the Mt. St. Elias Region, Alaska.

TOWNSEND W. THORNDIKE, *Secretary.*

Award of Club Medal for 1908

“He traded not with luker sotted.
He went for knowledge and he got it.”

(From an old book of travel, 1638.)

Harvard Travellers Club.

The forty-fourth meeting of the Club will be held at the residence of Mr. Edwin H. Abbott, 1 Follen Street, Cambridge, on Friday evening, April 24th, 1908, at 8.15 P. M. (Boston members should take Huron Avenue cars from subway. Follen Street is five minutes beyond Harvard Square.)

COMMUNICATION

SIX MONTHS IN THE SOCIETY ISLANDS

illustrated with lantern slides, colored drawings
and native products.

BY MR. GEORGE C. CURTIS.

A narrative of a trip to the South Sea Coral Islands—describing the purpose of the journey, what was collected, what was done with the material, the natives, the products, the view one gets of our own civilization when compared with manners, customs, and habits developed independently in mid ocean.

TOWNSEND W. THORNDIKE, *Secretary.*

The 44th meeting of the club was held April 24th at the residence of Mr. Abbot in Cambridge, present about 50. Mr. Curtis the speaker, gave an outline of his trip to the Society Islands describing their volcanic origin and the various changes they have undergone since they were first made. He also described his mountain climbing much of which was perhaps the most daring that I have ever heard.

Townsend W. Thorndike,
Secretary.

CORAL ISLE BROUGHT HOME

BORA BORA IN MINIATURE HERE AT HARVARD

How Landscape Sculpture Has Given a Perfect Scenic Reproduction of a Bit of Paradise in the Far South Seas—George Carroll Curtis and His Work—Wherein He Differs from the Makers of "Raised Maps"

A coral island come to Harvard! It would take more than the ordinary Harvard influence to really accomplish that, of course. But at the present moment the thing has come so nearly to realization that a visitor to the coral room in the big Agassiz Museum might be persuaded that he saw a veritable South Sea island spread out beneath his eyes.

It is only a model. But such a model! No mere geological relief, no raised map, has ever given such a picture of land and water as is now reproduced. No map-maker, nor the most scientific of geologists, has ever gone so far into the realm of the sculptor and the artist as George Carroll Curtis, the man whose recent protracted absence in the Southern Pacific has resulted in bringing to this Northern climate a kind of pocket edition of one of the most interesting geological forms heretofore foreign to these parts. Landscape artists are well-known here, but Mr. Curtis is a pioneer in landscape sculpture. He was in Harvard once, not so very long ago, as a student. Since then he won some local note through his model of the Metropolitan Park District of Massachusetts for the Buffalo Exposition. Now he is back again at Harvard to explain his latest achievement. In a lecture given this afternoon to members of the university and invited guests. In fact, he told the story of his expedition and set forth the views as to his chosen field of work now embodied in this article.

Mr. Curtis went to the Society Islands of Polynesia in the interest of Alexander Agassiz, to obtain the necessary data for making a model of Bora Bora, one of the islands of this group—a classic example chosen by Darwin to illustrate the volcanic island surrounding a central coral reef. The island is a classic example of a volcanic island surrounded by a coral reef.

artist claims to have verified it in the practical work in which he has been engaged during the past twelve years. The Bora Bora model really offered Mr. Curtis his first opportunity for carrying out these principles of reproducing natural landscape on a work of considerable size, and though there is vast opportunity for progress this work speaks for itself as to whether this kind of achievement is on the road to something better. It may seem strange at first thought that such a natural art as that of representing the earth in its own solid dimensions should have waited so long for its development, but closer study reveals the causes. It stands in this respect with other natural history arts, especially that of modern animal sculpture and animal painting; which, like astronomy, has waited for the necessary assistance of dry-plate photography to carry it to a further stage of development. Moreover, it is quite in the spirit of the modern quest of truthful nature study. The ancients, though proficient in the art of the human figure, could not "look at landscape," and their attempts to picture it in the background of their pictures were childish, and appear quite ludicrous to us. Even Claude Lorraine could not depict the landscape truthfully, and it is only through the more advanced knowledge of such modern men as Turner, Ruskin and our own Church and Moran that we have received the best in landscape painting.

For years we have had in our museums and schools certain peculiar objects known as raised maps. They are diagrammatic representations of paper maps, put into relief; roads and houses are painted on in various gaudy colors, names printed in, or any other empirical means employed that chanced to suit the fancy of the maker. These things, of course, had no semblance to the appearance of the land represented, and they were images without science, thought or art in their construction, therefore dead, unsightly things of no interest in themselves or to anyone except trained specialists. There is today a strong movement for something better. In the New York American Museum we may see today not the unsightly skins of dead animals, stuffed to the pleasure of some good mechanic and shelved in monotonous succession, but a herd of buffalo in living action, with the very ground of the plains beneath their trampling hoofs. A rookery of cranes, with young and old, surrounded by a faithful reproduction of the habitat; and, in short, truth, research and art have brought

instructive and interesting and

surface seeks similar truthful results, and aims to put the recently acquired knowledge of geography into adequate and thoughtful expression. It is all a part of the modern movement towards keen and intimate knowledge of the animate and inanimate forms of nature.

When some ten years ago the attention of the officers of Government Geologic Survey, under Director Walcott, was called to improvement in the arbitrary methods employed in the relief maps made for that bureau, the views met with a peculiar opposition. The chief geologist of the survey called the new scientific and artistic endeavors "pretty pictures." This, thinks Mr. Curtis, is the spirit with which improvement in the representation of the earth's surface has been received by some of the Government geologists. Holding that the best trained and most expert minds were necessary in dealing with other branches of geology in the public interest, with peculiar inconsistency, they have held that the difficult and exacting work of reproducing expressive forms of the earth's surface could be handled quite well enough by painters or common mechanics. This attitude was certainly not encouragement to a young man with the best training America and Europe could offer, struggling for a foothold, who knew by his speciality and had proved by his work that better things were sorely needed by the public.

Convinced that under such conditions there was no chance to do good work, recognizing that the subject had grown beyond the views or needs of the ordinary geologist, the artist concluded he was boring in a too narrow field. "You must judge for yourself," says he, "what were my decisions in regard to the merits of a new work when, after I had met with nothing but discouragement from the very scientific men whom I had expected would be the strongest supporters. I received in the outside world the praise of St. Gaudens and French, among the sculptors; Burnham and McKim, among the architects; Olmsted, among the landscape gardeners, and Shaler, Russell and Chamberlain, among the broader-minded geologists!" The way in which the public took the early endeavors was also convincing. Previously they had given scarcely a glance to such work, but

bringing others to look upon and discuss it. They were interested because they caught something familiar in the naturalistic work, when the earlier empirical reliefs had been meaningless in themselves.

In the Bora Bora model Harvard has scored another first. It is a beginning. It may give to those who have never realized the best possibilities of this medium an inkling of what the future may bring forth. Mr. Curtis will not yet prophesy as to about what, on theoretical grounds, there seems to be ahead for this far-reaching modern art, but to say it will have an important place in our natural history museums at least, is but reasoning on the trend of the nature study movement of the day.

wall of living coral which protects a mill-pond-like calm of apple-green water in the lagoon within. Rising into the very clouds stand vertical precipices of bare gray rock, flanked with a riotous mass of bowery tropic vegetation, crowding from the water level to every niche of the mountain tops. The sharpness of the angular peaks, the contrasts and depths of color, with the humid atmosphere, combine to make this isolated land and water most picturesque.

Bora Bora is a small island about five miles in diameter situated on the northern end of the Tahitian Archipelago, and reached at infrequent intervals from Tahiti over a boisterous sea and in unseaworthy little sloops. The island is inhabited by about two thousand native Polynesians, a proud, handsome race, who for the most part live the easy life developed before the least knowledge of the outside world had reached them. Mr. Curtis lived in one of their open pandanas, or roofed bamboo-sided houses; ate their strange, unsalted food for two months, while every portion of the island was visited and systematically photographed. The two summit peaks never before reached, were scaled. When complete data, including color sketches, had been gathered on the land, the deep sea was sounded all about the island within the radius of a mile. This was accomplished under the disadvantages of a leaky ship's boat and native canoes, in an average depth of from 500 to 800 fathoms. Having gathered the necessary data on the special island, Mr. Curtis remained five months studying the scales of the South Pacific, and on return to Boston began the construction of the model on which he has spent over two years of most exacting labor.

The results of this work, when compared with anything of this nature previously exhibited, are remarkable. Here is the exact form of this island as it appears to the eye of the traveller, with the color as we would see it in a truthful landscape painting. By comparing with photographs of the island, many of which were taken by the Albatross Expedition, the forms of rock, vegetation, native houses, are seen to have been reproduced to the detail of the scale of work. But probably the most striking feature is the handling of color, which is so well and truthfully conceived that at first it is scarcely noticed. On examination, however, each feature, while brought out clearly with its local color, is in harmonious relation to the subject as a unit. The deep tropic foliage, the glaring coral sands, the sun-warmed grays of the bare rock peaks and the cool white surf against the depths of the ocean, are shown with a vivid truthfulness comparable to that of a good painting. Indeed, Mr. Curtis advances the conception that the topographic, or landscape, model has in it, according to the limits of its own peculiar medium, quite the possibilities of canvas and oil in expressing landscape; that the modelling of the human figure and of animals and the modelling of the forms of the general subject, all governed by the same general subject, are governed by the same general laws of science and principles of art; that sculpture of land-forms bears the relation to the painting of landscape that sculpture of the human figure bears to portraiture.

HARVARD TRAVELLERS CLUB.
ANNUAL MEETING, MAY 15.

Following the address of Professor Tarr, Dr. Hamilton Rice, who has just returned from his expedition to South America, will give a short preliminary account of his work on the "Northwestern Branches of the Amazon River system."

TOWNSEND W. THORNDIKE, *Secretary.*

Harvard Travellers Club

The 6th annual and the 45th regular meeting of the club will be held at the Boston Athletic Club (entrance on Blagden Street) at 8.15 o'clock, Friday evening, May 15th, 1908.

BUSINESS.

Annual report of the Council and election of officers.
For President, Prof. William M. Davis.

Vice-President, Prof. Charles E. Fay.

Secretary and Treasurer, Dr. William Lord Smith.

Council, Prof. Theodore Lyman,
Dr. Townsend W. Thorndike.

COMMUNICATION.

"The Glaciers of the Mt. St. Elias Region, Alaska,"
illustrated with stereopticon slides, by

PROFESSOR RALPH S. TARR

of Cornell University.

A description of the earthquake of 1899 in and near Yakutat Bay, Alaska, with a statement of some of the changes which followed; also a description of some of the large glaciers which descend from the Mt. St. Elias chain in this vicinity, including the Malaspina Glacier. As a result of the earthquake, these glaciers were very greatly changed from their former condition.

HARVARD TRAVELLERS CLUB.

ANNUAL MEETING, MAY 15.

Following the address of Professor Tarr, Dr. Hamilton Rice, who has just returned from his expedition to South America, will give a short preliminary account of his work on the "Northwestern Branches of the Amazon River system."

TOWNSEND W. THORNDIKE, *Secretary.*

Minutes of the Annual Meeting held May 15th
at the Boston Athletic Club.

Attendance about 115, Vice-President Smith presiding.

The Secretary read the annual report of the club and it was moved and seconded that it should be accepted and it was so voted.

The following officers were elected by acclamation:-

For President - Prof. William M. Davis,
For Vice-President - Prof. Charles E. Fay,
For Secretary & Treasurer - Dr. William Lord Smith,
Councillors - Prof. Theodore Lyman and Dr. Townsend W. Thorndike.

The guest of the evening was Prof. Tarr of the Geographical Department of Cornell University. He gave an account of his work on glaciation in Alaska in 1906. Following his address a short discussion ensued.

Dr. Hamilton Rice also gave a brief account of his trip to South America. He will address the club more fully in October about his expedition. Following his introductory remarks, a length discussion took place and then the club adjourned.

Townsend W. Thorndike, Secretary.

A CIRCULAR, REGARDING CORRESPONDENCE WITH
DISTANT HARVARD MEN.

Harvard Travellers Club

The Harvard Travellers Club was formed in 1902 with the wish of bringing together men interested in travel, of entertaining them with narratives of distant lands and seas by members and invited speakers, and of contributing in this and other ways to "the promotion of intelligent travel and exploration", which is the declared object of the Club.

Membership is not limited to Harvard graduates or to travellers, but is composed of "men who are interested in the object of the Club." Resident members are those who reside within forty miles of the State House, Boston. The number of these grew so rapidly in the third year of the Club's life that a limit of 200 was set. This limit was reached in 1906 and has since then been maintained.

MAY 15.—F

A CIRCULAR, REGARDING CORRESPONDENCE WITH
DISTANT HARVARD MEN.

Harvard Travellers Club

The Harvard Travellers Club was formed in 1902 with the wish of bringing together men interested in travel, of entertaining them with narratives of distant lands and seas by members and invited speakers, and of contributing in this and other ways to "the promotion of intelligent travel and exploration", which is the declared object of the Club.

Membership is not limited to Harvard graduates or to travellers, but is composed of "men who are interested in the object of the Club." Resident members are those who reside within forty miles of the State House, Boston. The number of these grew so rapidly in the third year of the Club's life that a limit of 200 was set. This limit was reached in 1906 and has since then been maintained.

Fifty-three non-resident members are also on the Club list. Fellows to the number of nearly sixty have been elected from among the members whose journeys have led them off the ordinary routes of travel; and to these fellows is entrusted the government of the Club, under a constitution adopted in 1905. A Council of five members attends to the ordinary affairs of the Club. Three honorary members, whose names will be found also in the list of speakers below are: Hon. W. W. Rockhill, American Legation, Peking, China; Professor Nils Otto Gustaf Nordenskiöld, University of Gothenburg, Sweden; and Sir Colin Campbell Scott-Moncrieff, Chelsea, London, England.

Meetings have been held monthly except in summer, usually in private houses or in some Club in Boston or Cambridge; hence the necessity of limiting the membership. It has been an agreeable surprise to the Council to find an abundant supply of excellent speakers available. The names of the speakers and the subjects that they have presented, given in the list below, will illustrate the variety of good entertainment that the Club has enjoyed.

The Club gives a gold medal annually, in recognition of distinguished exploration by one of its members. In 1906, the medal was awarded to William B. Cabot, for explorations in Labrador; in 1907, to Ellsworth Huntington for explorations in Central Asia; in 1908, to Mr. Thomas Barbour for zoölogical exploration in New Guinea.

On March 18, 1908, the Club had an exhibition of trophies of travel, in which some thirty members took part. It is estimated that over 5000 objects were shown, and that the exhibit was attended by over a thousand persons.

Correspondence with Distant Harvard Men

A new branch of the Club's activity is now proposed.

It has seemed to the Council that many Harvard men who hold diplomatic or commercial positions in distant parts of the world might be willing to send communications to the Club from time to time, narrating some personal experience or interesting event in form for brief presentation to the Club, and that such communications, with or without photographic or other illustrations, might be presented at the meetings before or after the address by the speaker of the evening, with pleasant advantage to all concerned. The subjects for these communications may be best indicated as "anything that the writer, were he at home, would like to hear from some one else, abroad".

Mr. Edgar H. Wells, General Secretary of the Harvard Alumni Association, 50 State Street, Boston, has been appointed to undertake the correspondence incident to this new project. Members of the Club are invited to send to Mr. Wells the names and address of appropriate correspondents whom they may know as temporary or permanent residents of foreign lands.

A CIRCULAR, REGARDING CORRESPONDENCE
DISTANT HARVARD MEN.

Harvard Travellers Club

The Harvard Travellers Club was formed in 1900 with the wish of bringing together men interested in travel and exploration, of entertaining them with narratives of distant lands and seas by members and invited speakers, and of contributing in this and other ways to "the promotion of intellectual travel and exploration", which is the declared object of the Club.

Membership is not limited to Harvard graduates and travellers, but is composed of "men who are interested in the object of the Club." Resident members are those who reside within forty miles of the State House, Boston. The number of these grew so rapidly in the third year of the Club's life that a limit of 200 was set. This limit was reached in 1906 and has since then been maintained.

Annual Report of the Council of the Harvard Travellers
Club for the year ending May 15, 1908.

To the Members of the Harvard Travellers Club:

The Council has the pleasure of submitting its annual report for the sixth year of the Club's existence.

MEMBERSHIP.

During the year the membership has increased from 259 to 266. It is classified as follows:

	Members.	Fellows.	Total.
Resident,	155	30	185
Non-resident,	45	18	63
Life,	7	8	15
	<hr/>	<hr/>	<hr/>
	207	56	263
Honorary Members,			3
			<hr/>
			266

The resident membership is full. The Club has lost 3 members by death, 5 have resigned and 5 have been dropped from the membership. There is a constantly increasing waiting list.

FINANCES.

The Treasurer's Report for the year shows that we have an invested fund from Life Membership fees of \$400.00, and a cash balance of \$315.79.

Cash Balance, May 17, 1908,	\$716.88	
Trust Fund, May 17, 1908,	400.00	
Income for the year,	629.00	
	<hr/>	\$1,745.88
Club Expenses,	\$1,030.09	
Trust Fund,	400.00	
Balance in Bank, May 15, 1908,	315.79	
	<hr/>	\$1,745.88

MEETINGS.

There have been ten meetings held during the year.
The speakers at these meetings were:

- Oct. 18.—Dr. James McIntosh Bell,
"Explorations of the Southern Alps of New Zealand."
- Nov. 29.—Mr. Thomas Barbour,
"The Pacific Coast of Dutch New Guinea."
- Dec. 30.—Mr. V. Stefansson,
"Winter Life of the Esquimo."
- Jan. 31.—Mr. Isaiah Bowman,
"The Bolivian Andes."
- Feb. 14.—Annual Dinner.
Major Chas. Lynch,
"Manchuria During the Russo-Japanese War."
- Feb. 28.—Prof. T. A. Jaggar, Jr.,
"A Cruise Among the Aleutian Islands."
- Mar. 18.—Exhibition Meeting.
Prof. Wm. M. Davis gave the Opening Address, followed by Mr. Thos. Barbour, who gave a brief account of his expedition to New Guinea, and Mr. Ellsworth Huntington, who spoke on his recent journey in Turkestan.
- Mar. 27.—Prof. Roland Thaxter,
"A Journey to Southern Chili."
- April 24.—Mr. George C. Curtis,
"Six Months in the Society Islands."

May 15.—Prof. R. S. Tarr,

"The Glaciers of the Mt. St. Elias Region,
Alaska."

Dr. Hamilton Rice—Introductory account of
his recent So. American Expedition.

The Fellows have held two meetings, in which the business of the Club was discussed and acted upon. The speakers at these meetings were Dr. R. B. Dixon, who gave an account of his explorations among the Olympic Mountains; Prof Pickering, who spoke on his trip to the Azores Islands in 1907; and Prof. R. A. Daly, who narrated his experiences while carrying on his geological work in the Rocky Mountains.

AWARD OF THE CLUB MEDAL.

The Club Medal has been awarded to Mr. Thomas Barbour, of Cambridge, for zoölogical exploration in Dutch New Guinea.

For the Council,
TOWNSEND W. THORNDIKE.

Annual Report 1908 Harvard Travellers Club

The question of a house for the Harvard Club of Boston is recurrent. The founders of the Club, at the organization meeting, expressed this belief: That this is certainly not a question for present discussion; that the Club must develop as an organization first; that its functions and activities will doubtless present aspects wholly beyond the expectations or intentions of its founders; and if the future holds conditions which will require a clubhouse, then the ways and means of establishing one will become pertinent questions.

The Harvard Club of Boston begins its career with one great good fortune, in having Henry Lee Higginson for its first president. If the Club succeeds collectively in being to Harvard men and Harvard University what he is as an individual, it will be one of the greatest Harvard Clubs in the country.

Odin Barnes Roberts, '86.

THE HARVARD TRAVELLERS CLUB.

The Harvard Travellers Club was formed in 1902 with the wish of bringing together men interested in travel, of entertaining them with narratives of distant lands and seas by members and invited speakers, and of contributing in this and other ways to the "promotion of intelligent travel and exploration," which is the declared object of the Club.

Membership is not limited to Harvard graduates or to travelers, but is composed of "men who are interested in the object of the Club." A few undergraduates were originally included, but their number has decreased. Most of the members are doctors, lawyers, and business men in Boston. Resident members are those who reside within 40 miles of the State House. The numbers of these grew so rapidly in the third year of the Club's life that a limit of 200 was then set. This limit was reached in 1906, and has since then been maintained. About 50 non-resident members are also on the Club list. Fellows are elected from among the members whose journeys have led them off the ordinary routes of travel; and to these Fellows, numbering nearly 60, is entrusted the government of the Club, under a constitution adopted in 1905. A council of five members attends to the ordinary affairs of meetings; it also elects new members, selecting from among those nominated the ones who it is believed will best contribute to the Club's welfare. Three honorary members are the Hon. W. W. Rockhill, U. S. Minister to China, who in 1904 entertained the Club with an account of his "Travels in the Borderland of China and Tibet"; Prof. Otto Nordenskiöld, of Gothenburg, Sweden, who gave in 1906 a most graphic account of his adventures on the Swedish Antarctic Expedition of 1903-05, which he commanded; and Sir Colin Campbell Scott-Monerieff, of London, who in 1907 narrated

some of his experiences under the title, "Passages in the Life of a Roving Engineer," beginning with his going to the East in the last year of the Indian Mutiny and extending to his service in Egypt, where he was put by Lord Cromer in charge of the Nile.

Meetings have usually been held about once a month from October to May, in private houses or in clubs; hence the necessity of limiting the membership. It has been an agreeable surprise to the Council to find an abundant supply of excellent speakers available; a list of the regions described would cover the greater part of the globe. Nearly all the addresses have been illustrated with original lantern views. Of Club members, Dr. A. Hamilton Rice has described his journey across South America from the west to the east coast, and as he is now returning from a second journey of exploration in the same region, he is counted on as a speaker for the coming winter; Prof. Raphael Pumpelly has told of his archeological explorations in Turkestan under the Carnegie Institution; Mr. Langdon Warner, of his visit to Khiva; Prof. I. N. Hollis, of a cruise in the Pacific; Dr. W. Lord Smith, of hunting experiences in China, Corea and Java; Prof. W. M. Davis, of his journeys in the Tian Shan Mountains and in South Africa; Mr. W. R. Peabody, of climbs in the Canadian Rockies; Dr. A. M. Tozzer has described the natives of Yucatan; Prof. T. A. Jagger, Jr., a Harvard man teaching at the Institute of Technology, has told of his cruise among the Aleutian Islands in the summer of 1907; Mr. Isaiah Bowman, a Harvard man teaching at Yale, of his journey over the Bolivian Andes in the same year; Dr. J. M. Bell, a Harvard Ph.D., now director of the Geological Survey of New Zealand, of the Southern Alps in that distant land; Mr. C. P. Perin, '83, a Harvard mining engineer in New York, of his professional experiences in India; Dr. T. M. Rotch, of a summer tour to Spitzbergen and the ice-pack still farther north; Mr. V. Stefansson, of winter life among the Eskimo, as learned during his experience in 1906-07 at the mouth of the Mackenzie River; Prof. W. H. Pickering, of the volcanoes of Hawaii which he compared with those of the moon; Prof. S. I. Bailey, of a trip from the Harvard Observatory at Arequipa over the Peruvian Andes to the headwaters of the Amazon; Mr. E. B. Drew, who since his graduation in 1863 has been a resident of China as member of the Customs Service, has described the "Awakening of China"; and Prof. Theodore Lyman has told of a hunting trip in British Columbia.

Of non-members, Capt. R. E. Peary gave an account of his Arctic explorations to an audience that crowded the Fogg Lecture Hall, this address being open to the University public; Mr. Bailey Willis, of the U. S. Geological Survey, described his experience in China during a geological expedition under the Carnegie Institution; Mr. Charles H. Hawes,

of Cambridge, England, told of his travels in Eastern Siberia and the island of Sakhalin; Dr. A. C. Haddon, also of Cambridge, England, of his studies of the natives of British New Guinea; Mr. Herbert L. Bridgman, secretary of the Peary Arctic Club, of a visit to the Soudan; and Mr. Anthony Fiala, leader of the Ziegler Polar Expedition, of his two years in the Arctic regions.

One of the most important duties of the Fellows is the selection of the recipient of the Club medal, which is awarded this spring for the third time. The first medalist was Mr. W. B. Cabot, of Boston, selected in recognition of his explorations in Labrador, where he has made repeated journeys in the interior and whence he has brought home many good stories for the Club. The second medalist was Mr. Ellsworth Huntington, who like Bowman is a Harvard man teaching at Yale; his journeys in Persia in connection with Pumpelly's Carnegie Expedition, and in Eastern Turkestan, in connection with a journey undertaken by Mr. R. L. Barrett, of Chicago, have been described to the Club on various occasions, and have recently been made the subject of a book, "The Pulse of Asia," in which Mr. Huntington proposes to connect climatic variations with the progress of human history. The third medalist is Mr. Thomas Barbour, of the Graduate School, who spent the greater part of last year in a journey to New Guinea, where he made large and valuable collections chiefly of zoölogical subjects, and took many excellent pictures with which his address to the Club was illustrated.

On March 18, 1908, the Club held an exhibition of trophies of travel in one of the halls of the Horticultural Society's building in Boston, when over 5000 objects were placed on tables around the room and examined by a large number of visitors. The affair was given a social turn by serving tea in the afternoon; and in the evening a selection of views thrown on the screen gave the audience then gathered an indication of the kind of entertainment on which the Club has flourished.

A new branch of the Club's activity is now proposed. It has seemed to the Council that many Harvard men who hold diplomatic or commercial positions in distant parts of the world might be willing to send communications to the Club from time to time, narrating some personal experience or interesting event in form for brief presentation; and that such communications, with or without photographic or other illustrations, might be introduced at the meetings before or after the address by the speaker of the evening, with pleasant advantage to all concerned. The subjects for these communications may be best indicated as "anything that the writer, were he at home, would like to hear from some one else, abroad." Mr. Edgar H. Wells, General Secretary of the Harvard Alumni Association and a member of the Club (50 State St., Boston), has been

appointed to take charge of the correspondence incident to this new project.

As to officers: the president from the beginning has been Prof. W. M. Davis, who first proposed the formation of the Club; the secretaries have been Dr. J. C. Phillips, Dr. H. B. Bigelow, and Dr. T. W. Thorndike: the last-named has held office for four years, and to his faithful service the growth and success of the Club have been largely due. Dr. Thorndike being unable to hold the secretaryship any longer, Dr. W. L. Smith has lately been elected to succeed him. Among the Councilors have been Prof. A. C. Coolidge, Mr. R. P. Blake, Mr. J. H. Kidder, Prof. A. L. Rotch, Dr. J. L. Bremer, and Prof. Theodore Lyman. The address of the Secretary is 3 Willow St., Boston.

COMMUNICATION.

Sir Harry Johnston, G. C. M. G., K. C. B., D. Sc., Medallist R. Z. S., R. G. S., Special Commissioner for Uganda Protectorate, Explorer, Scientist, Writer, will give an address, illustrated with lantern slides, on

"THE CONGO STATE."

October 30, 1908, 8 o'clock, Boston Athletic Association, Blagden street entrance.

Owing to the unexpected arrival of Sir Harry Johnston in this country, Dr. Wm. Jason Mixer has kindly consented to postpone his address to a future meeting.

WM. LORD SMITH, Secretary.

THE CHELSEA
WEST TWENTY-THIRD STREET
NEW YORK

Oct: 27. '08

Dear Sir

I have
acknowledged your telegram
yesterday & now supplement it
of this note.

My lecture No. 1. might be
either on The Congo State or else
on Liberia, the West African Negro
Republic.

Of the former, the syllabus would
be. The aspects of the Congo basin
(physical geography, etc). The main
river Congo from Central Africa
to the sea. The fauna & flora.
The native races. The history.
(? politics, not too controversial).
Missionary work & its results
(purely from the ethnical point of
view).

The fauna & flora. The
Native races of man. The "native"
policy of Great Britain.
Big game preservation.

I am much indebted to you
for your kind financial
arrangements

Looking forward to meeting
you

Yours sincerely

H. W. Munster.

My name as usually given is

Sir Harry Johnston.

My address in the Boston district will
be Dr. Arnold Dolmetsch Esq.
11. Elmwood Avenue
Cambridge. Mass.

92
present

The 46th meeting of the club was held at the Boston Athletic Association Oct. 30 - 1908 - Attendance about 95 -

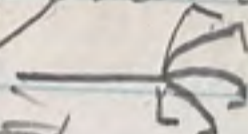

The vice president Prof. ^{Chase} May was presided over as the President Prof. Wm. M. Davis is, ^{this} ~~at~~ ^{winter} ~~present~~ exchange Professor in Berlin -

By great good luck Sir Harry Johnston who was ^{staying} in Cambridge for a few days, addressed the club on "The Congo State" -

The most interesting topic dealt with was cannibalism - The ~~noted~~ traveller told us how slaves & captives were fattened for eating & that special to most people, ^{human} ~~its~~ ^{its} lies in its way of ~~business~~ food was always captured at great distances from the feast - Among these people when men or women ~~are~~ become old, useless & unable to work or travel, they were tapped on the ~~the~~ head, given a ~~by~~ ^{with} ~~great~~ ^{great} pomp & ceremony & ~~the~~ ^{later} dug up & eaten -

When the English attempted to

2

cannibalism
 put an end to this custom, its natives
 formed it so called "Leopard Society"
 which eventually spread almost across
 its width of Asia. Members of the Leopard
 Society carried an  -

The ~~idea~~ of the Society was to abolish the
 English ~~fact~~ fact that cannibalism
 was still rampant.

By evening or night members of
 the society would go outside their
 village catch some wanderer. ~~or~~
 some wanderer, man or woman, kill
 them & then scratch them well with
 the leopard's claw, & the body was
 then brought to town & during murder
 commination, the rescuers of the body
 explained how the man had been
 killed & clawed by a leopard. The
 body was then buried & secretly dug up
 cooked & eaten.

3 -

So Harry Johnston also explained
the wonderful ~~method~~^{telegraphing} of telephones
method of communication by means
of drums - The ~~method~~ special
method ~~is~~ special ~~is~~. This is,
especially appointed in relays near
more miles apart - when a message
is given must be given to 15 or 15
tubes many tubes. These special drums
by a special method of beating seen by
+ a message to neighboring relays.
The drum then ~~repeats~~ repeats the
signals a 15 message words like
you think it counts -

Many photos were shown especially
interesting were 15 cameras + 15
Alfred's raw bears, the Alfred's name of
the special Johnston's - after the special bear
Prof. Frank Fay's Prof. Fay shows
two interesting slides - the pictures, the
of a M.S. of Dewey's map name

of the Sea Harry Johnston and
the tree of the distance ~~is named~~
called after the traveller -

The 47th regular meeting of the Club will be held at the University Club,
270 Beacon Street, Boston, at 8 o'clock, Friday evening, November 27, 1908.

COMMUNICATION.

Dr. Wm. Jason Mixer will speak on his expedition to the headwaters of
the Stikine River, B. C. Illustrated with lantern slides.

WM. LORD SMITH, Secretary.

53
present

The 47th meeting of the club was held at the University club on Nov. 27. Prof. Fay in the chair - Dr. Wm. Jason Murdo, its speaker, gave the club a good idea of the country at the head of the Stikine River, ^{B.C.} its ^{difficult} methods of travel by boat & ^{to get there} ~~the~~ ^{the} ~~large~~ wonderful variety of big game in this little visited country. Dr. Edward Richardson & Wm. Cross made the expedition with its speaker and its ~~part~~ ~~bag~~ ~~contents~~ of grizzly bears, moose, caribou, sheep (or is stam) & goat - one or two of its grizzlies fought back & took a good deal of killing - they ^(the bear) seemed not ^{to} ~~be~~ ^{as} ~~difficult~~ ^{to} ~~find~~ ^{because} ~~unlike~~ most grizzlies they live in the fall in open country & subsist largely on woodchucks. The caribou heads ~~one~~ shown at its meeting,

2

were simply huge with hundreds
 of branching outlets (10 layers
 common in the world) (the moose
 are of good size but no rival
 those found on the Kenai Penin-
 sular-Alaska - you come down the
 strike up one then it turns & takes
 15 feet to boat up - as it stream
 rushes down from its outlet like a
 mill race -

The 49th meeting of the Club will be held at the University Club, Beacon Street, Boston, on Friday evening, January 29th, at 8 o'clock.

COMMUNICATION.

F. T. Colby will speak on his expeditions into Alaska—The Alaskan Peninsular, The Kenai Peninsular. Illustrated by lantern slides.

WM. LORD SMITH, Secretary.

The forty-ninth meeting of the Club was held on January 29th. Dr. Townsend W. Thorndike, one of the council, presided. Attendance about forty-five.

Mr. Colby, who was the speaker for the meeting, gave an account of his journey ~~in connection with the W. I. T. expedition~~ to Alaska in 1907. The narrative was most interesting and most charming on account of its personal note. He described the possibilities of big game hunting, and touched upon the typography and economics of the Alaskan penninsular, describing the natives, and his hunting episodes.

T. W. Thorndike

The Fiftieth Meeting of the Club will be held at the UNIVERSITY CLUB, Beacon Street, Boston, on Friday Evening, February 26, 1909, at eight o'clock.

COMMUNICATION.

DR. HENRY BIGELOW will give an illustrated talk :—"Deep Sea Exploration in the Pacific."

FRANCIS T. COLBY,
Acting Secretary.

Harvard Travellers Club.

I shall be present at the Fiftieth Meeting of the Club Friday, February 26, 1909, at the University Club.

I shall bring guests.

Leut. Com. Sticht spoke for a few moments after Dr. Bigelow.

The fiftieth meeting of the Club was held at the University Club on February 26 at eight o'clock.

Dr. Henry B. Bigelow gave a very interesting illustrated talk upon "Deep Sea Explorations in the Pacific."

He gave a short sketch of the history "Deep Sea Explorations," followed by a description of the ship and apparatus used. He showed pictures of the nets and of the work in progress. This was followed by a statement of the chief results of the Albatross expedition to the Eastern Pacific in 1904 and 1905. Following this he showed some pictures giving an idea of a typical coral atoll. Finally he showed several photographs of the images on Easter Island and of a native festival in the Maldives.

Pictures.

donated by

Dr Henry B Bigelow

March 17, 1909.

The fifty-first meeting will be held at the University Club, Boston, on Friday evening, March 26, 1909, at 8 o'clock.

Colonel J. W. Collinbrander, of South Africa, will speak on his personal experiences in the Boer War and the Matabele Rebellion.

FRANCIS T. COLBY,
Acting Secretary.

The fifty-first meeting of the club was held at the University club on March 26, 1909 at 8 P.M.

Col. J. W. Collinbrander gave a most interesting talk upon his personal experiences in the Boer War. He gave an account of his fighting under Lord Kitchener for whom he raised a brigade of soldiers out of a country where the English generals could not have raised a man. He stated that most of the fighting was done on horse back, by making charges into the Boer camp at day break thus taking them off by surprise.

After the meeting he ~~gave~~ told those who remained several vivid descriptions of his fighting.

There were about 70 members present

78
Capt. Collins who was present with Col. Collinbrander in Boer War was present and ~~he~~ spoke for a few moments at the close of Col. Collinbrander's talk.

Harvard Travellers Club.

To the Fellows of the Harvard Travellers Club:

The Secretary has received the nominations of the following members for Fellowship:

- DR. GEORGE P. HOWE.
- GERRIT FORBES.

EXTRACT FROM CONSTITUTION.

ARTICLE IV, Clause 4. Nominations to Fellowship shall be made by two Fellows. Such nominations shall be printed and distributed with the notices of the next Fellows' Meeting. Election to Fellowship must be by ballot. At least eleven Fellows must be present, and four-fifths of those present must vote in the affirmative in order to elect to Fellowship.

NOTE Sponsors of a nomination for Fellowship, when unable to attend the meeting at which their nominee is presented for election, are requested to send to the Secretary a letter in regard to his qualifications. Such information will be presented at the meeting and will assist in determining the fitness of the nominee for Fellowship.

HARVARD TRAVELLERS CLUB

LADIES' NIGHT.

There will be a Special Meeting of the Club at Horticultural Hall, Friday Evening, May 7th, 1909 at 8 o'clock, to which members may bring ladies.

COMMUNICATIONS.

Professor A. C. COOLIDGE will speak, on "Some Impressions of South America." Professor THEODORE LYMAN will speak, illustrated with lantern slides, on "A Hunting Trip in British East Africa."

Please specify the number of tickets you desire on "reply postal card" before April 25th, 1909.

AMOS R. LITTLE,
Chairman Lecture Committee,
60 State St., Boston, Mass.

April 12, 1909.

Please send me _____ tickets for the meeting
of the Harvard Travellers Club on May 7th,
1909.

Name,

Address,

The meeting on Ladies' night was
very well attended. ^{200 present.} It was held at Horticultural Hall, Friday evening, May 7th
1909 at 8 o'clock.

Professor Coolidge's talk on South America was very interesting and enjoyed by all.

Dr Lyman had some ^{excellent} ~~very~~ good pictures
of his hunting trip in British East
Africa, which were much ~~enjoyed~~ by the
ordnance

Harvard Travellers Club.

The Fifty-second Meeting of the Club will be held at the Boston Athletic Club, (Blagden Street, entrance), on Friday, April 30, at 8.30 o'clock, P.M.

Brigadier-General Adolphus W. GREELEY, Chief Signal Officer, U.S.A. Arctic Explorer, will give an illustrated talk on "Scenes of the New Siberia."

FRANCIS T. COLBY,
Secretary Pro Tem.

112 Water St., BOSTON, MASS.

April 20, 1909.

Harvard Travellers Club.

The Nominating Committee report the following names to be voted for at the Annual Meeting.

President,	Prof. WILLIAM M. DAVIS.
Vice-President,	Prof. CHARLES E. FAY.
Secretary and Treasurer,	Dr. WILLIAM LORD SMITH.
Council,	Prof. THEODORE LYMAN, — FRANCIS T. COLBY.

The Annual Meeting of the Club will be held on Friday evening, May 21.

FRANCIS T. COLBY,
Secretary Pro Tem.

112 Water St., BOSTON, MASS.

April 20, 1909.

The Fifty second meeting of the Club was held at the Boston Athletic Club April 30th at 8-30 P.M. About fifty members were present.

General Greeley gave an enjoyable talk upon his trip across the Siberian Railway showing with what comfort and ease one could now travel through that barren land.

May 20, 1909.

The Annual Meeting of the Club will be held at the Boston Athletic Club, Blagden Street entrance, on Friday Evening, **MAY 28**, at eight o'clock, for the election of officers for the coming year and other relevant business.

COMMUNICATION.

Dr. Hiram Bingham, F.R.G.S., will give an Illustrated Talk on his Trip from Buenos Ayres to Lima, across Argentine, Bolivia and Peru.

Members are requested to fill out the return postal card with their names and addresses in full.

FRANCIS T. COLBY,
Acting Secretary.

Name in full,

Street,

City or Town,

State,

I shall ~~be~~ be present at the Annual Meeting and shall bring guests.

The annual meeting of the club was held at the Boston Athletic Club on Friday evening May 28 at eight o'clock. About sixty members were present.

The Secretary read the annual report of the club stating that present dues were not enough to cover the yearly expenses. The report was moved and seconded that it be accepted and was duly voted.

The following officers were elected

President Prof. W. H. Davis.

Vice-president Prof. Chas. E. Fay.

Secretary & Treasurer Dr. W. S. Smith.

Council Theodore J. Lyman -

Francis T. Colby -

President, ^{Davis} stated that the Fellows were considering raising the annual dues to \$5.00 and that their decision would be known early in the Fall.

After the business meeting Dr. Truman Bingham gave most interesting talk upon his trip through So America showing many excellent slides -

An enjoyable social hour was spent after the lecture.

Annual Report

Annual Report of the Council of the Harvard Travellers Club
for the year ending May 28, 1909.

To the Members of the Harvard Travellers Club:

The Council has the pleasure of submitting its annual report for the Seventh year of the Club's existence.

MEMBERSHIP.

During the year the membership has increased from 266 to 268, classified as follows:

	Members.	Fellows.	Total.
Resident,	152	32	184
Life,	8	8	16
			—200
Non-resident,	46	19	65
	—206	—59	—265
Honorary Members,			3
			—268

The resident membership is full. Three members have died. Two have resigned, and one has been dropped.

FINANCES.

CREDITS.

Cash on hand May 17, '08,	\$315.79
Receipts from dues for '07-'08,	12.00
Receipts from dues for '08-'09,	483.00
Receipts from initiation fees,	18.00
Receipts from Fellows dinner,	24.00
Received from the Appalachian Club	17.50

DEBITS.

Expenses previous to February 15,	\$299.52
University Club,	23.80
Boston Athletic Club	130.85
Horticultural Hall	50.00
Postage,	44.94
A. D. Handy, (Illustrating with lantern)	60.00
Edward Bradbury, (printing)	27.35
McCarter & Kneeland, (printing)	22.00
Thomas Groom & Co., (secretary's supplies)	.50
Hobbs & Warren, (secretary's supplies)	17.75
C. W. Clements, (testimonial to Prof. Putman)	5.00
Allen Bros., (rubber stamp)	1.00
Worcester Bros., (rent of chairs)	4.50
Bank Charges,	.10
Over-payment of dues returned,	3.00
Miss M. K. Dasey, (clerical services)	2.00
S. S. Pierce, (Refreshments)	8.77
Carried forward	\$870.29 \$701.08

Brought forward	\$870.29	\$701.08
Police Service, (Ladies' night)		3.50
Major General Greely's expenses		35.00
Western Union T. and T. Co.		.97
H. E. Orendorff, (clerical services)		53.20
Balance on hand June 5, 1909,		76.54
	\$870.29	\$870.29
Trust fund in Provident Institute for Savings,		\$500.00

MEETINGS.

There have been nine meetings this year.

The speakers at these meetings were:

October 30.—Sir Harry Johnston.

"The Congo State, its People, and its Geography."

November 27.—Dr. William Jason Mixer.

"A Shooting trip at the Head of the Stikine River, B. C."

December.—Prof. Charles E. Fay.

"Mountaineering by Noted Climbers in Different Parts of the World." Many slides, by Vittorio Sella.

January 29.—Francis T. Colby.

"A Shooting and Prospecting Expedition to the Alaskan and Kenai Peninsulas in 1907."

February 26.—Dr. Henry Bigelow.

"Deep Sea Explorations in the Southern Pacific."

March 28.—Col. J. W. Collinbrander.

"Personal Experiences in the Boer War and the Matabele Rebellion."

April 30.—Major General Adolphus W. Greely, U.S.A.

"Scenes of the New Siberia."

May 5.—Ladies' Night.

Prof. A. C. Coolidge.

"Some Impressions of South America."

Prof. Theodore Lyman.

"A Hunting trip in British East Africa."

May 28.—Annual Meeting.

Dr. Hiram Bingham.

"A Trip from Buenos Ayres to Lima, across Argentina, Bolivia and Peru."

AWARD OF THE CLUB MEDAL.

The award of the Club Medal will be announced later.

The Secretary is compiling a record of statistics of travel so that the Club may be able to give at least some assistance upon any country to members about to travel. All members are requested to send in whatever data they can in regard to the lands in which they have travelled. If possible, with maps.

The Club has issued a circular letter of introduction to be used in foreign travel. Copies may be had on application to the Secretary.

For the Council,

FRANCIS T. COLBY,
Acting Secretary.

HARVARD TRAVELLERS CLUB

BOSTON, 19

To HARVARD TRAVELLERS CLUB, DR.

Annual Dues for fiscal year ending May 1, 19

EXTRACTS FROM ARTICLE V. OF THE CONSTITUTION.

1. Resident members shall pay an initiation fee of five dollars, and annual dues of five dollars, to be paid in advance. (Adopted at a Fellows meeting, November 15, 1909.)

2. Members whose dues are two years in arrears shall be dropped from membership.

EXTRACTS FROM STANDING RULES.

1. Members who by change of address cease to be resident members shall notify the Secretary by letter before the next annual meeting, otherwise they will be liable for annual dues of the ensuing year.

2. Resident members who expect to be absent from home for more than one year may have their annual dues for that year remitted if they notify the Secretary by letter of their intended absence.

Received Payment.

.....
Treasurer.
9 Willow Street, Boston, Mass.

PART TWO

JAMES BARR AMES

The Appreciation of a Student and Colleague

BY EDWARD H. WARREN

Dean Ames made students think. He loved to teach, and he was a masterly teacher. He would bring out an idea, and the idea would seem entirely reasonable. He would bring out another idea, and that, too, would seem entirely reasonable. Gradually it would dawn on the student that the two ideas were quite inconsistent, and that he must decide which was right. The student was interested, stimulated, tantalized. The lectures by the dean, especially in the course on trusts, caused great mental disturbance, not to say anguish. He baptized men in brain fire.

The members of the faculty of the Harvard Law School believe that the most helpful way to teach law is to discuss with the students specific cases that have been decided by the courts. How does the judicial mind work? What considerations influence judges? Given a definite state of facts, how would the judges probably decide? The sum of legal knowledge is now immense. The stock of information that can be given to students is relatively small. The school does not attempt to store the minds of the students with answers to every legal question; it attempts to train their minds so that they may know how to go about it to get the answer to any legal question.

This is teaching by the case system. The introduction of this method was due to Professor Langdell, who preceded Professor Ames as dean of the school. Dean Ames was the disciple of Langdell. Langdell originated, Ames spread the idea.

He spread it in two ways. Each year scores (and lately hundreds) of young men were leaving the school who had been stimulated and strengthened intellectually by him. They prized the training and they found that it told in actual practice. In the second place, as other law schools wished to adopt the method, he gladly helped to make its introduction easy. Harvard has never made any attempt to guard the case system as a trade secret; it has, on the contrary, with both hands done its utmost to help other institutions to adopt it. Dean Ames was foremost in this. He put himself at the service of every law teacher in the country who wanted light and leading.

It is not too much to say that today, considering the country as a whole, the case system is the dominant method used in teaching law. No one—not excepting Langdell himself—has contributed more to this result than Ames. His influence has been national.

He analyzed the cases with his students by the Socratic method. He questioned much; he answered little. Those who came to hear the law laid down went away to ponder what it ought to be. He loved the battle of wits, but he never argued simply for the sake of victory. He helped men in many ways, but most of all because he made them help themselves.

suggestively, but after the talks were over—sometimes days and even weeks after they were over—I would find on my desk some volume of the reports, with a little slip of paper directing my attention to a particular authority and a few scribbled words in the dean's hand indicating how, to his mind, this authority bore on the point we had talked about.

During the six years that I was his junior colleague I cannot remember any important question of policy affecting the school on which I did not vote contrary to the dean. I am sure that this made not the slightest difference in his kindly feeling toward me.

With all his gentleness, he was a firm man. He was considerate, not afraid. When a student in Harvard College, he was captain of the nine. In 1894-5 he was chairman of the athletic committee, and when he came to believe that Harvard's athletic relations with Yale ought not to continue, he did not hesitate in taking his part in severing all such relations for a period of years.

He discharged his duties as dean with great conscientiousness, and gave personal attention to the details. He did not know how to delegate work, and he made no use of modern business methods. I do not believe that he ever dictated anything to a stenographer. He administered the loan fund (a fund to supply loans to students to be repaid by them after they have established themselves), and he did not even buy a book of blank promissory notes—the bodies of all the notes are written out in his own hand.

So long as he was sure he was not infringing upon the rights of others, he was oblivious to their comments. He utterly lacked self-consciousness, and he would go at a dog-trot through the streets of Cambridge, or even Boston, without its ever occurring to him that he might be making people stare.

He was not a poor man, but he lived in a very simple home in Cambridge. In summer he went to Castine, Maine, where he had acquired a large tract of land. He liked to be out of doors, and to work with his hands.

His living was plain and his thinking was high.

His wife gave into his life the spirit of old-fashioned roses.

Each Tuesday the members of the Law School faculty lunch together. A few weeks ago, just as the lunch was finishing, the dean leaned forward in his chair and said: "I am very sorry to say that I must leave the Law School. It may be only for a short time, but I may not be able to come back at all. I have been examined by three physicians and none of them can tell me what is the matter with me. But I find I can't remember names. I can't recall the name of any one of you here without extraordinary effort. It has taken me three hours to prepare a lecture that I've usually prepared in half an hour. I must go away at once. Now I don't want any of you to be unhappy about this. I am not at all unhappy myself. If I never come back, it will not make me

used more to this result than Ames. His influence has been national.

He analyzed the cases with his students by the Socratic method. He questioned much; he answered little. Those who came to hear the law laid down went away to ponder what it ought to be. He loved the battle of wits, but he never argued simply for the sake of victory. He helped men in many ways, but most of all because he made them help themselves.

He never practised at the bar, and was a legal philosopher rather than a lawyer. In some ways this marred his efficiency, but in other ways it increased it. He took broad views which could be taken only from heights to which few, if any, practitioners could ever rise. He viewed the law as a whole, and he searched for the great principles that underlay it. In constructive legal imagination, he has probably never been equalled by any person learned in the common law. He had the most suggestive mind with which I have ever come in contact.

He loved to evolve and apply a legal principle. Once satisfied that a certain principle was sound, he would look for applications of it in all branches of the law and his enthusiasm would lead him to believe that judges had acted on the principle in deciding certain cases where (in all probability) the judges had been profoundly unconscious of any such principle. This tendency grew on him in later years. It made him warp the authorities, and it led him into inaccurate statements as to the state of the authorities. I think this was his greatest fault, but it was hardly to be expected that a mind could be so original and constructive without this fault. He did not state the authorities—he illuminated them.

He would defend his legal principles as though they were his young. In the case of Price vs. Neal, A was the holder of a draft upon which the signature of the drawer had been forged. B, the drawee, paid the draft. At the time of the payment both A and B believed the draft to be genuine. When the forgery was discovered, B sought to recover back from A the money paid, but the court held that he could not. The dean believed that this case was simply an illustration of a very broad principle—that if both men acted in good faith, equity would let the loss lie where it fell. It differed—not believing that there was any such general principle running through the law, or that there ought to be. "If you yourself should, in the best of faith, take my money for some worthless thing," I said to him, "I have entire confidence that, forthwith upon your discovering that it was worthless, you would insist upon reimbursing me." The dean grew almost indignant. "I would do no such thing," he said. "I would not pay you a penny." I might think ill of him, but I must not think he would deviate from the true principle of Price vs. Neal.

Legal history had great attractions for him. Within the four corners of a Year Book, he was in Paradise. Less than a year ago he said: "If I did just what I wanted to do, I would give myself up to legal history." He has written a few articles on legal history which will always endure. It is a great pity that he did not write more.

His personality was one of great charm. He was sincerely interested in the welfare of every student. He was invariably courteous, and altogether the gentleman. He had a patience that was stupidity-proof. He gave himself lavishly to any student who wanted to talk to him at any time on any subject to any length. He swayed the hearts, as well as the minds of his students. There are thou-

year, or I may not be able to come back at all. I have been examined by three physicians and none of them can tell me what is the matter with me. But I find I can't remember names. I can't recall the name of any one of you here without extraordinary effort. It has taken me three hours to prepare a lecture that I've usually prepared in half an hour. I must go away at once. Now I don't want any of you to be unhappy about this. I am not at all unhappy myself. If I never come back, it will not make me unhappy. If this is the end, I shall have had long years of service, and far more in my life than most men ever have. I must leave you to make provision for the school."

applications of it in all branches of the law and his enthusiasm would lead him to believe that judges had acted on the principle in deciding certain cases where (in all probability) the judges had been profoundly unconscious of any such principle. This tendency grew on him in later years. It made him warp the authorities, and it led him into inaccurate statements as to the state of the authorities. I think this was his greatest fault, but it was hardly to be expected that a mind could be so original and constructive without this fault. He did not state the authorities—he illuminated them.

He would defend his legal principles as though they were his young. In the case of Price vs. Neal, A was the holder of a draft upon which the signature of the drawer had been forged. B, the drawee, paid the draft. At the time of the payment both A and B believed the draft to be genuine. When the forgery was discovered, B sought to recover back from A the money paid, but the court held that he could not. The dean believed that this case was simply an illustration of a very broad principle—that if both men acted in good faith, equity would let the loss lie where it fell. It differed—not believing that there was any such general principle running through the law, or that there ought to be. "If you yourself should, in the best of faith, take my money for some worthless thing," I said to him. "I have entire confidence that, forthwith upon your discovering that it was worthless, you would insist upon reimbursing me." The dean grew almost indignant. "I would do no such thing," he said. "I would not pay you a penny." I might think ill of him, but I must not think he would deviate from the true principle of Price vs. Neal.

Legal history had great attractions for him. Within the four corners of a Year Book, he was in Paradise. Less than a year ago he said: "If I did just what I wanted to do, I would give myself up to legal history." He has written a few articles on legal history which will always endure. It is a great pity that he did not write more.

His personality was one of great charm. He was sincerely interested in the welfare of every student. He was invariably courteous, and altogether the gentleman. He had a patience that was stupidity-proof. He gave himself lavishly to any student who wanted to talk to him at any time on any subject to any length. He swayed the hearts, as well as the minds of his students. There are thousands of men today whose grief is real because Ames is dead.

He was thoughtful, in a way that a man is seldom thoughtful toward other men. During my first year in the faculty I lectured, among other things, on equity jurisprudence. It was a difficult year. Again and again I sought out the dean to talk with him about points in equity that were troubling me. It was not only that he talked freely and very

"Men call him mad, and ask what worth
One little point of frozen earth?
One worthless unit of a sphere
That holds so much to bless and cheer?
Fools all, they never guess the strength
That leads him o'er an ocean's length
That bids him brave the cold and snow
And forces that we little know,
What tho' the shifting southern pack
Shall close for aye the homeward track?
What tho' a bleak, untrodden shore
And fearful perils loom before?
This is his life, to do and dare,
To tattle with this northern air,
To see the same white landscape run
Behind him in the midnight sun;
To brave the dangers of the foes;
To see the wondrous life and forms
That revel mid contending storms
And feel that all that he has gained
Is nothing to the unattained."

COMMUNICATIONS

Dr. William Lord Smith and Mr. Gorham Brooks will describe a shooting expedition in British East Africa. (Illustrated.)

9 Willow St., Boston,
February 18th, 1910.

WM. LORD SMITH
Secretary

The sixty-first meeting of the Harvard Travellers Club will be held at the University Club, Beacon Street, Boston, on March 25, at 8 o'clock.

The communications announced for the February meeting had to be withdrawn on account of unavoidable absence of the speakers. In their place Mr. Charles R. Cross, Jr., gave an account of a hunting trip in the Kenai Peninsula, Alaska, and Mr. Francis T. Colby of a similar trip in Ceylon. The subject announced for the February meeting will be presented in modified form in the coming meeting as follows:

COMMUNICATION:

A collecting and hunting trip in British East Africa in the summer of 1909, by Dr. W. Lord Smith and Mr. Glover M. Allen, with lantern illustrations and specimens.

March 17, 1910
9 Willow Street, Boston

W. LORD SMITH,
Secretary

A special meeting of the HARVARD TRAVELLERS CLUB will be held in the Trophy Room, Harvard Union, Cambridge, at 12.30 o'clock, Thursday, March 31, in honor of Sir Ernest Shackleton, who will be a guest of the Club.

Luncheon will be served at one o'clock, prompt. Each member may invite one guest. Those intending to be present are requested to send their check (\$1.50 a cover) to the Secretary not later than Monday, March 28.

At the close of the luncheon the health of our guest will be proposed by President Lowell, and Sir Ernest will reply. At half-past two o'clock the meeting will adjourn to the Living Room of the Union, where the explorer will be greeted by a gathering of students.

It may be added for information of members of the Club that Sir Ernest Shackleton is to lecture in Symphony Hall, Boston, on the evening of March 31. Tickets are now on sale at the hall. A number of tickets will be on sale for the convenience of members at the regular meeting of the Club, March 25.

WILLIAM LORD SMITH,
Secretary

9 Willow Street, Boston
March 23, 1910

Ladies' Night

The sixty-second meeting of the HARVARD TRAVELLERS CLUB will be held in Huntington Hall, Rogers Building, Massachusetts Institute of Technology, Friday evening, April 29, 1910, at 8 o'clock.

It is desired that members invite friends, *including ladies*, to attend the meeting. Additional tickets, beside those enclosed herewith, may be had on addressing the Secretary.

Communications

(Promptly at 8.15)

JULY 8, 1910

PROFESSOR THOMAS A. JAGGAR, JR., of the department of geology of the Massachusetts Institute of Technology, and Professor Charles Spofford, of the department of civil engineering, are now in Costa Rica making a study into the cause and nature of earthquakes and the type of structures and architecture best suited to resist earthquakes.

The sixty-third meeting of the HARVARD TRAVELLERS CLUB will be held at the University Club, Beacon Street, Boston, on Friday evening, October 28, at eight o'clock.

COMMUNICATIONS:

Dr. Alfred M. Tozzer, leader of the Peabody Museum Expedition, 1909-10, will speak on "Guatemala and Its Ruins."

Mr. H. G. Ferguson, '04, Geologist, Philippine Bureau of Science, will describe some Philippine volcanoes.

Both talks will be illustrated by slides.

October 20, 1910.

9 Willow St., Boston.

WM. LORD SMITH,

Secretary.

There were about 70 members present at the sixty-third meeting held at the University Club on Oct 28, 1910. President Davis before introducing the speakers gave an outline of the expected topics for the winter meetings of the club.

Dr Tozzer spoke from 20 to 25 minutes on his work in Yucatan during the past summer. He considered chiefly the Maya civilization, the chief features, its archeology and the probable date or period at which its highest point of influence was reached. He went into some

Harvard Travellers Club

At a recent Fellows meeting, it was voted to send to all members of the Club a list of nominations now in the hands of the Secretary. The list is given below.

In view of the small number of vacancies to be filled, the Council requests members to express their estimate of the nominees as possible members of the Club. It should be remembered in this connection that the policy of the Council in electing new members, as announced in the last annual meeting, is to give preference to actual travellers as compared with those having an interest in travel, and to elect those nominees who will make the most valuable members independent of their order of nomination.

Replies received before January 12, 1911, will be considered at the next meeting of the Council for electing new members.

PROGRAM

MONDAY

Exhibition will open at noon, and there will be the following illustrated talks

- 4.00 Prof. Theodore Lyman
A Journey to the Altai Mountains
- 8.30 Mr. Ernest Harold Baynes
Bird Conservation

TUESDAY

Exhibition will open at 10 A.M., and there will be the following illustrated talks

- 4.00 Mr. John T. Coolidge, Jr.
Photography of African Game
- 8.30 Prof. Roland B. Dixon
A Journey in the Northern Himalayas

WEDNESDAY

Exhibition will open at 10 A.M., and there will be the following illustrated talks

- 4.00 Mr. H. W. Du Bois
Hunting with a Camera in British Columbia
- 8.30 Prof. Hiram Bingham
Recent Explorations in the Land of the Incas

Tea will be served each afternoon following the talk

The sixty-fourth meeting of the Harvard Travellers Club will be held at the University Club, Beacon Street, Boston, on Friday evening, November 25th, at eight o'clock.

COMMUNICATION

Mr. Frank Edward Johnson, of Norwich, Conn., will give a talk on "Tunisia, its Troglodytes, Roman Ruins and Mosques." (Illustrated.)

November 17, 1910
9 Willow Street, Boston

WM. LORD SMITH
Secretary

The attendance at the sixty-fourth meeting was about 50.

Mr. Johnson of Norwich Connecticut an artist, whose acquaintance with northern Africa dates back 20 years, gave a most interesting description of Tunisia.

This included Carthage, Susa

the oasis of Gohes, Kerouan, Roman
ruins in the interior and the
Troglodytes.

The club has perhaps never had
so much new material, emphasized
by beautiful slides placed before it,
certainly never from a country so
close at hand and yet so little
known.

Mr Johnson astonished us by
saying he made most of his inter-
ior journeys over the Sahara Desert
in an automobile.

The view of the sea from the
site of old Carthage photographed
near the spot where Duen Uedo's
golden steps ran down to the sea
(and which served as a beacon
by day to the mariners when
the sun flashed on them) was
most picturesque.

A remarkable description
followed of a mohammedan
sect in Kerouan who do honor
to our prophet Christ by voluntary
punishment by priests.

The priests drove rounded
round rapers well beneath the

THE DESERT

TRIPOLI IN BARBARY, the only state in Northern Africa under Mohammedan rule and the last Turkish possession on that continent, is one of the least known countries of the world. Yet nowhere in Northern Africa can the life of town, oasis and desert be found in so natural and picturesque a state as in Tripoli. Mr. Furlong spent many months in North Africa on two long visits. He gives a vivid description of this "most native of the Barbary capitals, its odd and fascinating customs, industries and incidents; a view of those strange and interesting people who inhabit the oases and table-lands of Tripolitania, their primitive methods and patriarchal life; an account of the hazardous vocation of the Greek sponge divers off the Tripoli coast; a story of the circumstances surrounding the dramatic episode of the burning of the United States frigate *Philadelphia* in 1804, and of the discovery of the wrecked hull below the waters of Tripoli harbor in 1904; a narrative of some personal adventures which occurred during a trip alone with Arabs over some two hundred miles of the Great Sahara; and a description of the daily life and vicissitudes of the camel and the Sahara caravans, of the trails over which they travel, and of the great wastes which surround them." Mr. Furlong has finely felt and described the beauty and wonder of the desert and he tells of the extraordinary picturesqueness

Wm Lord Smith.
Secretary.

About sixty members present.
Mr Furlong told of his trip to Fuegian
Archipelago, Smyth Channel region Patagonia
travelling about 2400 miles from Atlantic
to Pacific between south latitudes $50^{\circ}17'$
and $55^{\circ}13'$. About 1700 of this was water
travel in the Strait of Magellan, West

and Fuegian channels, about 700
was land travelled in Tierra-del-Fuego
and Patagonia

He was with the first scientific
expedition and he was the first American
to cross through the heart of Tierra-del-Fuego

He studied the habits of the following
tribe; Yahgans, Alaculops, Onas, and
Teheuchus.

He also told of his recent trip in 1910
in Dutch Guiana, travelling from lower
~~Bush~~ Maroni River through ~~the~~ to
Paramaribo by canoe while studying
the people of the Venezuelan littoral
from La Guayra to Boca Grande of
Orinoco. He followed up the Orinoco
and Apure Rivers to San Fernando de
Apure, then following more or less
Humboldt's trail across the Estero llano
and llanos of Venezuela to Caracas
of V. Distance travelled not exactly computed
but at least 3000 miles covered.

He studied the customs of Arawak,
Carib and Bororo (Bush Negroes - including
the Djocka, Boni, and Laramacca.

The sixty-sixth meeting of the Harvard Travellers Club will be held at the Exchange Club, Milk Street, Boston, on Friday evening, January 27, 1911.

The meeting will begin at seven o'clock with a dinner, at \$2.00 per plate, of the whole club, to which each member may bring one guest. Members are requested to fill out the enclosed blank and return it with check payable to the Harvard Travellers Club before January 24.

The dinner will be followed by a talk by Mr. George Mixter and Mr. Samuel Mixter. Subject, "Afoot Across the British Columbia Rockies." (Illustrated.)

WILLIAM LORD SMITH,
Secretary.

JANUARY TWENTY-SEVENTH

·1911·

MAN began by being a savage and a nomad. Then civilization made him more stationary. Now he is becoming again what we may call a scientific nomad, with fixed habitations indeed, but not with the fixed habit of confinement to locality. We may depend upon it that the increased experience of men and places and things, derived from the new habit of travel, is going to be a freshening influence on the world.

In reply to your letter of the 21st asking for a resume of my last summer's trip we left Vancouver on July 2nd for Wrangell. From here we went by gasoline boat to Telegraph Creek where we got our horse outfit, men etc. From here we followed the Ashcroft Trail parallel to the Stikeen River then up the Okaza (usually called the Klappan) River to its head, crossing to the Spatseezeh, another tributary of the Stikeen, which we followed also to its head. It was on the Okaza that I left my brother^{Sam}, who remained in this vicinity and had very good hunting. From the head of the Spatseezeh my party crossed to the Tsa-ka-dzoa, also a branch of the Stikeen, striking it near its head and following it down a couple of days' marches. We then followed a small tributary to its head and crossed to the head of a small river which flowed eventually into the Finlay. We crossed this and one or two other small rivers touching a large unnamed lake about 20 miles long, then across a burned strip to the shore of Lake Thudade'. We followed the shore to the lower end, where it forms the head of the Finlay, which we crossed and going over the height of land struck the head of the Ingenika. We followed this down to the mouth, a distance of 150 miles, where it flows into the Finlay, cutting off the big bend which the main river takes. This country is badly burned and in places still burning. Following down the Finlay we reached Ft. Grahame where we left our horses and got a 40 foot dug-out. In this we went down the Finlay to where it meets the Parsnip forming the Peace, continued down the Peace past the Finlay and Parlepas

Rapids to the head of the Hudson's Hope Canyon where we abandoned our canoe, and got our stuff across the portage with the aid of some Indians and their horses. As the H.B. post at the other end was not open we built a small raft and floated down to Ft. St John, where we built a larger raft and floated down to Peace River Crossing. Here we took a wagon to Ft. Lesser Slave Lake. As the boat on the lake was sunk we had to take another wagon and go to Sawridge at the head of the Lesser Slave River where we got a York boat to take us to the rapids. From here we went by wagon down the Lesser Slave and Athabasca Rivers to a point opposite Athabasca Landing where we had to wait a day until the river, which had just set, froze solid enough to cross on the ice. From Athabasca Landing we went by stage to Edmonton on the C.P.R., reaching there on November 11th. The distances are about as follows:- Wrangel to Telegraph 150 miles, to Ft. Grahame 550 miles, to Hudson's Hope 120 miles, to Ft. St John 60 miles, to Peace River Crossing 300 miles, to Ft. Lesser Slave Lake 100 miles, to Sawridge 80 miles, to the rapids 40 miles, to Athabasca Landing 110 miles, to Edmonton 100 miles. Hoping that this will be what you want, I remain

Very truly yours

George Mixter.

The sixty-seventh meeting of the Harvard Travellers Club will be held at the University Club, 270 Beacon Street, Boston, Friday evening, February 24, at eight o'clock (for 8.15 prompt).

COMMUNICATIONS:

Mr. Charles Lyon Chandler, '05, U. S. Vice-Consul General at Buenos Aires, Argentine Republic, will speak on "The New Buenos Aires."

Mr. W. S. C. Russell, of Springfield, Mass., will give an account of "Iceland from Horseback." (Illustrated.)

February 17, 1911
9 Willow Street, Boston.

WILLIAM LORD SMITH,
Secretary.

Mr Chandler gave an informal talk briefly discussing the general conditions now prevalent in the Argentine Republic. Elaborated somewhat on the prospects of our trade with that country and spoke especially of the new and rapidly developing Patagonian territories.

My talk was along the following lines:-

HORSEBACK TOUR IN SAGA LAND.

Methods of travel. Myvatn, the crater lakes with crater islands. The solfataras of the slopes of Krafla. Mt. Krafla the volcano of the far north.

The bird life of Iceland, especially the ducks.

The glaciers and the approach to the same.

The wonders of the great Surtshellir Cave, the largest lava tunnel in the world.

Some of the waterfalls, Gothafoss, Gullfoss and the Brua'

A little of the life of the people, not much.

Closing with a few experiences with the people that showed their characteristics.

W. S. C. Russell

Brinckerhoff Dies Martyr to Science

DR. WALTER R. BRINCKERHOFF.

DEATH OF HARVARD LEPROSY EXPERT

Dr. Walter R. Brinckerhoff of
Medical School Dies at
Jamaica Plain.

NOTED FOR HIS RESEARCHES

Bride Who Joined in Work on
Hawaiian Leper Isle Died
While There.

Dr. Walter Remsen Brinckerhoff, assistant professor of pathology at the Harvard medical school, who spent nearly five years in the leper colony at the Island of Molokai, Hawaii, seeking a cure for leprosy, died yesterday morning at his home, 1 Parsay Vale, Jamaica Plain. He was taken ill four days ago while at the medical school.

The illness was acute and for the last 36 hours he was unconscious. A post-mortem examination by Medical Examiner Magrath indicated that death was due to acute focal pneumonia of the left side.

Dr. Brinckerhoff was widely known as an authority on leprosy. He was the first director of the leprosy investigation station of the United States Public Health and Marine Hospital Service at Hawaii, receiving his commission in 1906, staying in the leper settlement on Molokai until he resigned last fall to accept his position at the Harvard law school.

He was also well known for special researches on the white cells of the blood and for elaborate investigations of smallpox. The latter work was carried on in Boston in 1901 and 1902 and in Manila in 1903 and 1904. He, himself, considered that his life work was to be a thorough study of white blood cells and at the time of his death was maturing plans for such a study.

Dr. Brinckerhoff was born in Matteawan, N. Y., July 4, 1874, the son of the Rev. Peter Remsen and Helen Morton Brinckerhoff. He was graduated from Harvard in 1897 and from the Harvard

medical school in 1901. His expert training in pathology was obtained in the laboratory of the Boston City Hospital, where he was successively interne and second and first assistant in pathology. He became assistant in pathology at the Harvard medical school in 1902. He was a fellow of the Rockefeller Institute for Medical Research in 1904, and was appointed physician to the Carnegie archaeological expedition to Trans-Caspia in 1905.

He was married in August, 1907, to Miss Nellie White of Winchendon, a niece of former Gov. John D. Long and the daughter of the late millionaire, Nelson D. White. As Dr. Brinckerhoff was then engaged in his study of leprosy, Miss White went to Honolulu, where they were married. She joined with him in his work on the leper isle of Molokai. In April, 1909, the cablegram "Nellie is dead," brought the information that the young society girl, heiress to many millions, who had deserted her place in society to live in a leper colony, had passed away, leaving a baby boy.

Dr. Brinckerhoff was a member of a number of medical societies, the University Club of Boston and the Harvard Club of New York. Besides his infant son, he is survived by his mother and two brothers, Nelson Brinckerhoff and Henry R. Brinckerhoff of New York.

March 2.
February 1911

The usual monthly meeting of the HARVARD TRAVELLERS CLUB will be omitted this month, as the Exhibition meeting comes the first week in April.

Boston, 9 Willow Street
March 25, 1911

WM. LORD SMITH,
Secretary

The exhibition of the Harvard Travellers Club will be held on Monday and Tuesday, April 3 and 4 respectively, at Copley Hall. As in our previous exhibition three years ago, there will be exhibited by various members many interesting things which they have collected on their travels or hunting expeditions in different parts of the world. It is also planned to have illustrated talks by members of the club on the afternoon and evening of both days, the subjects and lecturers to be announced later.

Members are requested to communicate in writing with the Exhibition Committee before the 11th of March and give them an idea what they can show and about how much space they will require. The committee will appreciate suggestions from any member and trusts that our membership will all help to make the affair a success by making their exhibits as interesting as possible.

Communications with reference to exhibits should be sent to Dr. William Jason Mixter, 180 Marlboro Street, Boston, Mass.

Committee on Exhibition,

WILLIAM JASON MIXTER, Chairman.
FRANCIS T. COLBY.
AMOS R. LITTLE.

Boston, Mass.,
February 21, 1911.

300
Ordinary

To the Members of the Harvard Travellers Club:

Gentlemen:

In order to make the Exhibition a success, your committee has come to the conclusion that we must have about six hundred dollars (\$600.00) to finance the undertaking. It is thought best to raise this money among our membership by subscription and we therefore hereby appeal to you to subscribe as liberally as you feel you can. Checks should be sent to Amos R. Little, treasurer of the Exhibition Committee, 18 Tremont Street, Boston, Mass. The committee will appreciate it if the members will send in their subscriptions at once, as they will then be in a position to carry out their plans.

Committee on Exhibition,

WILLIAM JASON MIXTER, Chairman.
FRANCIS T. COLBY.

... with the heads of moose, caribou and mountain sheep, with the skins of Alaskan bears, of lions, tigers, leopards, Copley Hall, on Clarendon street, looked at a first glance yes, like the headquarters of some sports club when thrown open to the members of the Harvard Travellers' Club. Hanged about the walls and in the smoking rooms were

Man's Costume from Alberta Blackfoot Indians. Woman's Dress of Soft-Tanned Buckskin, from Sioux Tribe About 1870.

Large Crowd Sees Harvard Trophies Despite Rain—Lectures on Alps and Patagonia.

The exhibition of the Harvard Travellers' Club in Copley Hall closed last evening. So great was the attendance that extra seats had to be provided and many stood throughout the lecture-talks. The speakers were Dr. William Lord Smith, who told about "Climbing the Dolomites," and Charles Wellington Furlong, who told of Tierra del Fuego and its fast disappearing natives.

Yesterday afternoon Francis T. Colby, many of whose trophies of the chase were shown in the hall, gave some of his experiences while hunting in Africa. George Mixter spoke of a trip "Afoot Across British Columbia."

Dr. Smith exhibited several views made on his mountain climbs in the Austrian Tyrol showing members of his party climbing some of the most precipitous cliffs.

Mr. Furlong, speaking of Tierra del Fuego, accused the sheep raisers, Americans as well as Chilians and Argentinians, of having caused in the last 15 years the death of 90 per cent. of the natives, whose lands they needed for sheep pasturage. From 3000 he said the number had been reduced to 300 in this period, \$1 per head being the average paid for "potting" natives.

The speaker said he had called the attention of the governments of both Chili and Argentina to the situation and had urged that the lower half of the island be set apart as a reservation for the Indians.

shot pick
For the first time in three years this organization yesterday gave a view to its members and their friends of the many trophies collected by the hunters, travellers and explorers who make up its membership. Afternoon and evening, with the aid of stereopticon views, the talks were descriptive talks on the experiences of some of the exhibitors, and these talks will be continued today.

India to Alaska.

Yesterday afternoon Prof. J. W. Woods gave a talk on some of his experiences and observations in India, followed by Dr. Charles G. Mixter and Charles R. Cross, Jr., who told of the Alaskan brown bear and their experiences in hunting him. In the evening Prof. Thomas A. Jaggar, Jr., of Tech, a graduate of Harvard, '93, gave an illustrated talk on volcanoes, and John W. Worthington talked on canoeing in New England.

Prof. Jaggar exhibits many photographs of volcanoes, covering his wide travels. Among other exhibits are these:

Dr. William Lord Smith, lion, tiger, leopard and other skins from India and Ceylon; Dr. I. J. Mixter, Dr. William Jason Mixter, Dr. Charles G. Mixter, George Mixter and Samuel Mixter, Alaskan hunt trophies and curios; Theodore Lyman, globe-trotting pictures; Francis T. Colby, skins and trophies of hunting in America, Asia and Africa, with the arms used; Charles V. Furlong, who is to talk this evening on the Fuegians, many curiosities from Patagonia and Tierra del Fuego.

R. Clifton Sturgis shows pictures and relics from Labrador and elsewhere; Alfred M. Tozzer, genuine prehistoric relics and some forgeries, marked as such, from Yucatan and parts of South America; Prof. Albert Bushnell Hart, figures illustrating the costumes and some life of the Samurai of Old Japan.

Curios from Thibet.

Dr. Charles G. Weld, skulls and mummies from Peru; Thomas Barbour, curios from Thibet and from Peru and Ecuador; Dr. Theodore J. Eastman, a wealth of blankets, beadwork, clothing, fur bonnets and other exhibits illustrating the costumes, religion and other features of the life of various North American Indian tribes.

Prof. A. Lawrence Rotch shows in diagrams some of his explorations of the upper air, while the pictures made at the Flagstaff Observatory, showing Halley's comet in all its glory, which have been previously exhibited in Boston, are again on view for the benefit of those who have not had other opportunity to see them.

The exhibition will be open this afternoon and evening. At 3:30 Francis T. Colby will talk on hunting in Africa and at 4 George Mixter will tell of his travels afoot across British Columbia. At 5:30 Dr. William Lord Smith will tell of climbing the Dolomites and at 6 Charles Wellington Furlong will tell of Tierra del Fuego and its strange and unknown people.

HARVARD
TRAVELLERS
CLUB

YEAR BOOK
1911

The Nominating Committee have reported the following nominations for officers for the coming year :

President

THEODORE LYMAN

Vice-President

THOMAS A. JAGGAR, JR.

Secretary and Treasurer

WILLIAM LORD SMITH

Council

THEODORE LYMAN, Chairman

THOMAS A. JAGGAR, JR.

WILLIAM LORD SMITH

WILLIAM C. FARRABEE

A. LAWRENCE ROTCH

WILLIAM LORD SMITH,
Secretary.

9 Willow Street, Boston.
May 11, 1911.

The annual meeting of the Harvard Travellers Club will be held at the University Club, 270 Beacon Street, Boston, on Friday evening, May 19, at eight o'clock.

Business: Annual report of the Council.
Election of officers for the year
1911-12.

COMMUNICATIONS

Prof. Theodore Lyman will give a short talk on "The Yellowhead Pass."

Dr. Denman Ross will speak on "The Ruins of Cambodia" (illustrated).

WM. LORD SMITH,
Secretary.

9 Willow Street, Boston.
May 11, 1911.

ORIC BATES FOUND OASIS

Returns to Boston After Two
Years' Exploration in Af-
rican Desert.

SOLVED SHOOTING MYSTERY

Prof. C. R. Brown Comes on the
Romanic from Jerusalem
Archaeologists.

Explorations in deserts of Africa, volcanoes under the sea, excavations in the Holy Land and medical reports were some of the subjects for table talk in the saloon of the steamship Romanic on her passage from the Mediterranean which ended at Charlestown yesterday afternoon. Among the passengers were an archaeologist, an explorer, a health commissioner, and a former map maker.

Oric Bates, son of Prof. Arlo Bates of the Massachusetts Institute of Technology, returned from two years' exploration in the Libyan desert. During the first year he was in the employ of the Egyptian government. One of the results of his exploration was the discovery of an oasis, Umm Es Schattah, which bore traces of ancient occupation. The oasis, which was 14 days' journey by caravan from the nearest habitation, was about five miles long, and contained a salt lake $2\frac{1}{4}$ miles long. There was evidence that at the time of its habitation it had been of much greater extent than at present.

Mr. Bates believes that he has information that will tend to clear up the mystery of the shooting of Herbert DeCou, assistant of Richard Morton, who was engaged in archaeological work in Egypt. He declines to discuss the matter until he has filed a report with the American Archaeological Institute. Mr. Bates will return to the Levant in three months.

Prof. Charles Rufus Brown of the Newton Theological Institution, who for the last year has been at the head of the school of archaeology at Jerusalem, returned on the liner. He is inclined to discredit the report of discoveries of great importance by the expedition of Capt. Parker, whose activities created discontent among the natives, based upon the report that Capt. Parker had stolen the Ark of the Covenant. Prof. Brown attributed the rumors to the secrecy under which the English expedition was operated.

E. A. Creevey of Bridgeport, American consul at St. Michael's, Azores, brought a report of a submarine eruption of a volcano some miles from that city. Cooked fish floated for miles on the surface of the water, he said, and earthquakes were severely felt on shore. Lieut.-Col. F. A. Charves of the Portuguese army has been detailed to make an investigation of the eruption.

Dr. H. D. Geddings, American health officer at Naples, who was mobbed in that city for telling the truth about the cholera situation there some months ago, returned to this country on a year's furlough.

Among the other passengers was Capt. F. Huntington Holmes, U. S. N., retired, who for three years was attached to the Charlestown Navy Yard and was later head of the hydrographic bureau here. Capt. Holmes was with Dewey at Manila Bay, and afterwards commanded the cruisers Marblehead and Baltimore. He now makes his home in Rome.

The Romanic brought 91 saloon, 162 second cabin and 113 steerage passengers, besides a large cargo, including 10,200 crates of lemons.

Edward G. Graves, the new surveyor, accompanied by Deputy-Surveyor Moses B. Mann, watched the work of the customs officers. It was the surveyor's first official visit to a foreign arrival.

BRUIN QUAKING IN HIS LAIR

Boston Boy, With Bow and
Arrows, Plans Bear
Hunt Far West.

To hunt bears in the approved Indian fashion, with bows and arrows, is the plan of Harry B. Richardson, former Harvard student, son of Dr. Maurice Richardson of Boston.

Mr. Richardson, who is an expert archer and holder of the Western championship trophy, will leave this city in the early part of July for Seattle, where he will be joined by James Challis and Z. E. Jackson of Atchison, Kan., and William H. Thompson of Seattle, also expert archers.

The party will leave Seattle August 9 and sail up the coast of British Columbia, 400 or 500 miles, on the steamer Spokane.

When they reach a locality that seems favorable they will disembark and, armed only with bows and arrows, will strike into the interior, there to track the fierce grizzly to his lair. It is the opinion of Mr. Richardson's family, however, the young men would do well to provide themselves with a plentiful supply of food and not depend on bear meat.

The four archers will use the regular hunting arrow and will take a large supply so as not to run short. Mr. Jackson and Mr. Challis are both experts in the manufacture of arrows and have made the whole stock in their spare moments during the winter.

Mr. Challis considers the bow more sportsmanlike than the rifle. "For," says he, "there is the same difference between hunting with bow and arrow and with a rifle as between fishing with a fly and catching fish in a seine."

Boston's Young Hunter Of Grizzlies

**WILLIAM T. PIPER DIES
IN BOSTON HOSPITAL**

**Was Harvard Man and Prominent in
Cambridge and Boston Literary Cir-
cles—Death Due to Tonsillitis Epi-
demic.**

William Taggard Piper, 57, of 179 Brattle st., Cambridge, died at the Massachusetts Homeopathic hospital at 11.40 p.m., after an illness continuing for two months. His death, however, was directly due to the epidemic of tonsillitis which visited Cambridge a few weeks ago.

He was born in Boston. He was educated in the Boston Latin school and afterward entered Harvard, graduating with the class of 1874, with Phi-Beta Kappa honors. He secured his master's degree in 1881 and his Ph.D. in 1883. He then pursued post graduate work at Trinity college, Cambridge, Eng.

He has been for a number of years a trustee of the Massachusetts Homeopathic hospital; a director of the Cambridge Trust Co.; president and trustee of the Avon Home for Children; member of the common council of Cambridge, 1888 to 1889; member of the board of aldermen, 1890; member of the school committee since 1891. He was also trustee of the public library of Cambridge for a number of years.

He was a member of the Colonial society of Massachusetts, New England Historical Genealogical society, the Union club of Boston and the Oakley Country club.

William T. Piper.

Cambridge, July 26.—William T. Piper of Cambridge died at the Mass. homeopathic hospital, of which he was president of the corporation.

His death was due to an attack of tonsillitis which he suffered at his home, 179 Brattle st., about three weeks ago.

He is survived by two sons, William B. Piper, supervisor of the U. S. forestry service, and Ralph C. Piper, and two daughters, Elizabeth Briggs Piper and Anne Briggs, wife of Ald. Matthew Hale of Boston.

Piper's wife, who was Anne Palfrey, daughter of John G. Palfrey, well known in literary circles, died last May.

Charles G. Weld
Died
June 18 1911

The seventieth meeting of the Harvard Travellers Club will be held at the residence of Professor Theodore Lyman, on Friday evening, October 27th, at 8.15 o'clock. Take Chestnut Hill electric car from the Subway to Reservoir Lane (30 minutes.) Entrance on the left directly opposite Reservoir Lane.

COMMUNICATION

Professor R. DeC. Ward will speak on the "Coffee Plantations of Brazil." (Illustrated.)

October 14, 1911.
9 Willow Street, Boston.

WM. LORD SMITH,
Secretary.

President Lyman presided at the meeting. On account of the bad evening only twenty-five members were present.

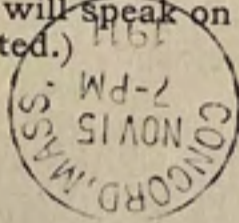

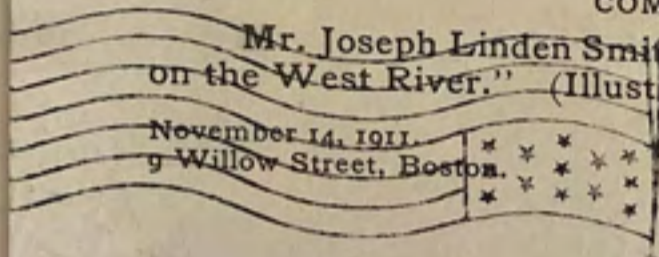

Professor Ward spoke most interestingly about the St Paulo District where three-fourths of the world's coffee is grown. The one feature that Mr Ward brought out was that the climatic conditions together with the favorable soil enabled the planter of that district to produce coffee cheaper than elsewhere. It is a clear monopoly as the producers can increase or restrict the output as they see fit.

The seventy-first meeting of the Harvard Travellers Club will be held at the Boston Athletic Club, Blagden Street entrance, on Friday evening, November 24, at 8.15 o'clock.

COMMUNICATION

Mr. Joseph Linden Smith will speak on "Scenes in Peking and on the West River." (Illustrated.)

THE WORLD'S DEBT TO LAWRENCE
ROTCHE

With the death of A. Lawrence Rotch this country loses one of its most active experimenters in meteorological work and a man who has upheld the reputation of American scientific work among foreign nations. The Blue Hill Meteorological Observatory stands as a most honorable monument of his achievements. Here for twenty-five years and more he maintained a meteorological laboratory which has attacked, one after another, the problems of the science and has tried them out. Without formality or red tape Mr. Rotch attacked those suggestions that seemed to intimate benefit to knowledge, and in their tentative stages bore the cost of experiments, and oftentimes carried them on till their importance made them of international value, to be further developed as works in which many observatories and many nations could cooperate.

The first systematic measurements of the height of clouds were carried forward at Blue Hill. With a device evolved at the Saturday evening round-tables of the Boston Scientific Society and built for Mr.

one of its members, the first series of measurements was made. The work afterwards developed, theodolites from long poles at the end of a base were employed and the possibility of results shown in question. The work has since been carried on at other institutions in different parts of the earth and has been of international character. In the kite work, also, Mr. Rotch with his observatory led the way.

Mr. Eddy, a New Jersey man, had read in some book of travels of the Malay Archipelago, which would fly without the usual tail that had in civilized countries been deemed necessary. Mr. Eddy applied himself to the same society for opportunities to fly his kites and was taken to Blue Hill by a member and introduced to Mr. Rotch. It required no time at all for him to realize the importance of the kite for "sounding the air," and from that moment the observatory devoted much of its energies to the flying of kites.

With two remarkable assistants, Mr. Clayton and Mr. Fergusson, the elements to successful investigation were furnished. Mr. Clayton developed forms of kites, while Mr. Fergusson evolved a lightweight recorder that could be sent aloft without hampering the kites. There was collected by these observations a mass of material so important that it was not long before kite flying attracted the attention of other countries and kites were sent up everywhere. It became an international method, certain observatories sending up kites at the same time so as to present the instantaneous conditions of the upper air all over the civilized world. These two items are perhaps the most brilliant of the researches initiated by Mr. Rotch, but in the development of them and in the carrying out of them, not investigations or methods were always an important factor.

One of the matters in which he was the first to initiate a new method of work was in the beginning of local weather work which was made up at such stations as needed. In the earlier days the predictions were formulated in Washington. It had for half a dozen years been the custom of the leaders of Appalachian Mountain Club parties to predict for themselves the weather two or three days ahead when parties were about to start. This was done from the figures sent daily from Washington, maps being made with the important weather conditions depicted. At that time Sergeant Cole was in charge of the Boston station, and knowing of this work he suggested its adoption regularly for local predictions for the country about Boston. The small capital required to make this experiment back about 1885 was furnished by Mr. Rotch, who was alive to the benefits that would arise from such a development. After some time it was adopted by the Signal Service.

The conditions and currents of the upper air Mr. Rotch recognized to be of the greatest importance to meteorology, and he exploited, therefore, every means of increasing the world's stock of knowledge about them. The cloud work gave the clew to the general direction of prevailing currents, but cloudless days afforded no records of the kind, nor were there any for those regions between the clouds or above the lower ones when they covered the sky. The kites solved some of the problems for the zones in which stations were situated from which the kites could be used, but there were still gaps in the complete work. To fill some of these Mr. Rotch's system of free balloons was put into service, these being sent up from St. Louis with regularity for a certain length of time. Of similar nature in the extension of the work was the expedition undertaken by M. Tisserand de Bort, an enthusiastic Frenchman, and Mr. Rotch, which cruised the Atlantic on both sides of the Equator, flying kites and sending up balloons, till a reasonable knowledge of this hitherto unknown region was gained.

Meanwhile throughout all the years there was maintained the ceaseless watchfulness of meteorological conditions at the surface. At a time when only Dr. Draper in the Central Park Observatory was using self-recording apparatus for the purpose Mr. Rotch recognized the benefits of the continuous record. His observatory was therefore fitted out with all kinds of instruments, some of them originated there by the skill of the mechanical staff, and has continuous records of the weather that probably reach further back than those of any observer save Draper. This material has been of vast importance in the study of the minutiae of atmospheric phenomena.

Incidental to the inspection of mountain observatories in other parts of the world Mr. Rotch developed skill as an alpinist. The most important observatory at a height in Europe was for some years that of Vallot on Mont Blanc—not the Janssen summit observatory, but a thousand feet or so less elevated—so that he made many ascents, seven or eight climbs to the summit of Mont Blanc and a good deal of tramping through the comparatively unfamiliar higher passes in the range.

Died April 7th

PROF. A. LAWRENCE ROTCH

He Was Distinguished Especially for His Study and Knowledge of Meteorology, in Which His Authority Was Widely Recognized

Professor Abbott Lawrence Rotch of 235 Commonwealth avenue, founder and director of Blue Hill Observatory in Milton, one of the foremost scientific men of the country, who has devoted his life to the study of meteorology, died at the Elliot Hospital yesterday after an operation for appendicitis.

Professor Rotch was stricken Thursday afternoon, but nothing serious was thought of his illness until Saturday, when Dr. Samuel Mixter, the family physician, was summoned. He had Professor Rotch taken to the hospital, where an operation was performed at once, but it came too late to save the life of the scientist. Professor Rotch was born in Boston Jan. 6, 1861, the son of Benjamin Smith Rotch and Annie Bigelow (Lawrence) Rotch. He was educated in private schools and by a tutor and continued his studies in Boston, Paris, Florence and Berlin. He was graduated a bachelor of science from the Institute of Technology in 1884 and was awarded the honorary degree of master of arts by Harvard University in 1891.

He established the Blue Hill Observatory in 1885 as a private meteorological station and had supported and directed it since. His work was of such importance in the world of science that he was ranked by many with Benjamin Franklin as a student of the upper air. His observations in his chosen field were received in every country of the globe as authoritative. The work of the observatory, however, was mainly research, which is widely known to meteorologists through publication. Clouds especially were studied. The first exact measurements in America of the height and velocity of clouds, by trigonometrical and other methods, were made there in 1890-91, and the measurements were repeated in 1896-97 as part of an international system.

On Blue Hill, in 1894, the first meteorological instrument recording graphically and continuously lifted by kites was sent up, and the possibility of obtaining data simultaneously in the free air by means of kites and on the ground was thereby demonstrated. This method of exploring the free air was improved by the aid of a grant from the Hodgkins fund of the Smithsonian Institution, and very valuable results were obtained.

The first meteorological records over the ocean were obtained by Professor Rotch in 1901 on a voyage across the Atlantic Ocean. The use of kites to obtain meteorological data is now general in Europe, and on a fixed day each month coöperative flights are made on Blue Hill. It was he who made the first observations from five to ten miles above the American Continent with balloons. This was achieved in 1904. Again, in 1903, he obtained the first trigonometrical measurements of pilot balloons in the United States. He collaborated with Teller de Bort in sending a steam yacht to explore the tropical atmosphere in 1905-06, and participated in a number of scientific expeditions in the United States, South America, Europe and Africa.

An indefatigable student of every science in the remotest degree related to meteorology, Professor Rotch conducted some extremely interesting experiments with wireless telegraphy and kites. Messages were sent to the station on Mt. Chickatawbut and some very valuable data were obtained. While his work was yet so novel as to inspire great curiosity, a number of balloons were released over Berlin in 1902 as part of the programme of the International Aeronautical Commission. The president of the German division, Herr von Bezold, warmly praised Mr. Rotch's labors.

Professor Rotch was professor of meteorology in Harvard University since 1900. He was a member of the International Jury of Awards in the Paris Exposition of 1899 and was made a Chevalier of the Legion of Honor. He received the Prussian Orders of the Crown in 1902 and of the Red Eagle in 1903 in recognition of his efforts in advancing the knowledge of the atmosphere. As an authority on balloons he frequently delivered lucid and interesting lectures on that subject, from its beginnings to the latest efforts of aeronauts. Professor Rotch was deeply interested in airships, was president of the Harvard Aeronautical Society and was one of the principal agents in the great exhibition held here in September, 1910. It was he who developed the idea of the exhibition, which surpassed anything of its kind previously undertaken in the United States and is an annual feature that attracts the attention of aviators throughout the world. The success of the Harvard aviation meets was in great part due to the splendid ability of Professor Rotch.

He was associate editor of the American Meteorological Journal from 1886 to 1896. He lectured in the Lowell Institute course in 1891 and 1898; was librarian of the American Academy of Arts and Sciences and was a trustee of several educational institutions in Boston. As one of the earliest American enthusiasts in ballooning he was active in the formation of the Aero Club of America and was a member of the board of governors, representing the Aero Club of New England at the time of his death. He was one of the founders of the New England body, and at one time served as its president. He was also a member of the Federation International Aeronautic Commission.

His writings are widely known in the scientific field. Among them are "Sounding the Ocean Air," "The Conquest of the Air" and a chart of air currents of the northern hemisphere. In addition to these, he published many monographs on subjects pertaining to meteorology.

He married Margaret Randolph Anderson of Savannah, Ga., in November, 1892, and is survived by Mrs. Rotch and three children, Dr. Arthur Rotch and Margaret Randolph and Katherine Lawrence Rotch.

The Nominating Committee report the following names to be voted upon at the Annual Meeting.

<i>President</i>	PROF. THEODORE LYMAN
<i>Vice-President</i>	PROF. THOMAS A. JAGGAR, JR.
<i>Secretary and Treasurer</i>	DR. WILLIAM LORD SMITH
<i>Council</i>	PROF. THEODORE LYMAN (Chairman)
	PROF. THOMAS A. JAGGAR, JR.
	DR. WILLIAM LORD SMITH
	DR. WILLIAM CURTIS FARABEE
	DR. FREDERICK ADAMS WOODS

Ladies Night

The seventy-sixth meeting of the Harvard Travellers Club will be held in Legion of Honor Hall, 200 Huntington Avenue, Boston, Friday evening, April 26th, at eight o'clock.

It is desired that the members invite friends, including ladies, to attend the meeting. Additional tickets may be had on addressing the Secretary.

COMMUNICATION (Promptly at 8.15)

Mr. Carl E. Akeley will give a talk on "African Big Game—Elephant Hunting on Mt. Kenia."
