PD

Hi Michael,

Attached are two photos of the right-side (roof peak) clock face of the Jaffrey Meetinghouse taken in 1996. The one on the building was before removal for restoration. The other was at my previous location in Goffstown after restoration. Notice the notch at numeral VI for the building roof peak.

Brad had asked me if I thought that face needed repair or was paint sufficient. I had not inspected the face as I assumed that was already determined. The two photos provide a comparison of condition over the 25 years and aid in determining if the face boards should be replaced. The dial will need to be removed for new face boards as there are two layers of boards. The second layer is horizontal behind the outer vertical face boards. Removal may be a bit involved with the proximity of the shake roof.

Hope this is helpful.

Sincerely
Philip D'Avanza

Subject: Jaffrey Meeting House Clock Face Work

Brad,

Please reach out to phil at d'Avanza Clocks for the work on the Meeting House Clock faces. Phil maintains the clock and is very familiar with the clock and the dials.

I had a phone conversation with Phil this morning and he will be looking for your call. His number is (603) 497-2256.

Regards,
