Hi Rob and Mike

Please find attached the Quote from Phill Davanza for the purposed clock face work. Phill recommends not removing the clock faces but only the numerals and the hands, then he will gold leaf the numerals and make new hands in the shop then reapply. Stebbins would paint the clock faces with the same Sherwin Williams product that Phill has used in the past while the faces are bare of hands and numerals.

Stebbins owes me a price that was carried for the clock sope but in the discussions with them thus far, its seems that it will be much less than Phills quote, so it will not be a wash price wise. Also note that he is providing new clock hands which has added value and there will be a second mobilization with manlift to reinstall after his work is completed if we go this route.

I wanted to get this over to your right away so we can at last finalize a plan of action for this portion of the scope.

Please let me know your thoughts and any questions. It seems as though everyone is on board to have Phill do the work but with the added scope, I feel that it justifies a change in contract amount on my end.

Thank you,

Bradley Davis

Hi Brad,

Attached is the proposal for the Jaffrey Meeting House clock face work. I can be available for the removal of the elements later part of next week.

Please contact me if you have any questions or need additional information.

Thankyou,
Phil
