Also forgot to inquire if the green color used at clock tower has ever been identified? If not, are we to color match what is there?

Thank you
Brad

Hi Robert

Painters requested that the clocks be shut down by Friday as they hope to be working in that area starting then- is that doable? We discussed it but not sure how it is done.

Also hope to have news on the clock face work either later today or tomorrow. I reached out to Phill and he is working on a scope to present to me.

Thank you
Brad Davis
